

Software Engineering Lab Manual

Experiment-1

Ques. Explain the term SDLC.

Ans. SDLC stands for software development life cycle. It is a process used by the software industry to design, develop and test high quality software.

It consists of a detailed plan describing how to develop, maintain, replace and change or improve specific software.

Major software development activities include gathering requirements, software design and implementation, code testing, documentation and maintenance.

Many different software processes but all involve:

- i) Specification – Defining what the system should do, all the functionalities it should have.
- ii) Design and implementation- Defining how to do the project, designing a blueprint of the project and then implementing it with technical tools and coding.
