Caffe2 Quick Start Guide Ashwin Nanjappa,2019-05-31 Build and train scalable neural network models on various platforms by leveraging the power of Caffe2 Key FeaturesMigrate models trained with other deep learning frameworks on Caffe2Integrate Caffe2 with Android or iOS and implement deep learning models for mobile devicesLeverage the distributed capabilities of Caffe2 to build models that scale easilyBook Description Caffe2 is a popular deep learning library used for fast and scalable training and inference of deep learning models on various platforms This book introduces you to the Caffe2 framework and shows how you can leverage its power to build train and deploy efficient neural network models at scale It will cover the topics of installing Caffe2 composing networks using its operators training models and deploying models to different architectures It will also show how to import models from Caffe and from other frameworks using the ONNX interchange format It covers the topic of deep learning accelerators such as CPU and GPU and shows how to deploy Caffe2 models for inference on accelerators using inference engines Caffe2 is built for deployment to a diverse set of hardware using containers on the cloud and resource constrained hardware such as Raspberry Pi which will be demonstrated By the end of this book you will be able to not only compose and train popular neural network models with Caffe2 but also be able to deploy them on accelerators to the cloud and on resource constrained platforms such as mobile and embedded hardware What you will learnBuild and install Caffe2Compose neural networksTrain neural network on CPU or GPUImport a neural network from CaffeImport deep learning models from other frameworksDeploy models on CPU or GPU accelerators using inference enginesDeploy models at the edge and in the cloudWho this book is for Data scientists and machine learning engineers who wish to create fast and scalable deep learning models in Caffe2 will find this book to be very useful Some understanding of the basic machine learning concepts and prior exposure to programming languages like C and Python will be useful   Redshift Render Basic User Guide Serdar Hakan DÜZGÖREN, Redshift is a high performance production quality renderer that supports biased rendering techniques for incredibly fast noise free renders With Redshift you can get the rendering performance of a small render farm from your existing workstation saving you time and money and unleashing your creative potential This guide provides information on setting up and using Redshift In addition to documenting the various features and settings of Redshift this guide provides important tips to help you get the most out of Redshift including helping you choose the most appropriate global illumination techniques to use for a given scene and how to troubleshoot problems like splotches or flickering during animations To navigate this guide simply pick a topic from the Table of Contents on the left You can also search for a specific keyword using the search box located in the top right corner of every page   **Principles and Labs for Deep Learning** Shih-Chia Huang,Trung-Hieu Le,2021-07-06 Principles and Labs for Deep Learning provides the knowledge and techniques needed to help readers design and develop deep learning models Deep Learning techniques are introduced through theory comprehensively illustrated explained through the TensorFlow source

code examples and analyzed through the visualization of results The structured methods and labs provided by Dr Huang and Dr Le enable readers to become proficient in TensorFlow to build deep Convolutional Neural Networks CNNs through custom APIs high level Keras APIs Keras Applications and TensorFlow Hub Each chapter has one corresponding Lab with step by step instruction to help the reader practice and accomplish a specific learning outcome Deep Learning has been successfully applied in diverse fields such as computer vision audio processing robotics natural language processing bioinformatics and chemistry Because of the huge scope of knowledge in Deep Learning a lot of time is required to understand and deploy useful working applications hence the importance of this new resource Both theory lessons and experiments are included in each chapter to introduce the techniques and provide source code examples to practice using them All Labs for this book are placed on GitHub to facilitate the download The book is written based on the assumption that the reader knows basic Python for programming and basic Machine Learning Introduces readers to the usefulness of neural networks and Deep Learning methods Provides readers with in depth understanding of the architecture and operation of Deep Convolutional Neural Networks Demonstrates the visualization needed for designing neural networks Provides readers with an in depth understanding of regression problems binary classification problems multi category classification problems Variational Auto Encoder Generative Adversarial Network and Object detection   *Hands-On Deep Learning with Go* Gareth Seneque,Darrell Chua,2019-08-08 Apply modern deep learning techniques to build and train deep neural networks using Gorgonia Key FeaturesGain a practical understanding of deep learning using GolangBuild complex neural network models using Go libraries and GorgoniaTake your deep learning model from design to deployment with this handy guideBook Description Go is an open source programming language designed by Google for handling large scale projects efficiently The Go ecosystem comprises some really powerful deep learning tools such as DQN and CUDA With this book you ll be able to use these tools to train and deploy scalable deep learning models from scratch This deep learning book begins by introducing you to a variety of tools and libraries available in Go It then takes you through building neural networks including activation functions and the learning algorithms that make neural networks tick In addition to this you ll learn how to build advanced architectures such as autoencoders restricted Boltzmann machines RBMs convolutional neural networks CNNs recurrent neural networks RNNs and more You ll also understand how you can scale model deployments on the AWS cloud infrastructure for training and inference By the end of this book you ll have mastered the art of building training and deploying deep learning models in Go to solve real world problems What you will learnExplore the Go ecosystem of libraries and communities for deep learningGet to grips with Neural Networks their history and how they workDesign and implement Deep Neural Networks in GoGet a strong foundation of concepts such as Backpropagation and MomentumBuild Variational Autoencoders and Restricted Boltzmann Machines using GoBuild models with CUDA and benchmark CPU and GPU modelsWho this book is for This book is for data scientists machine learning engineers and AI developers who want to build

state of the art deep learning models using Go Familiarity with basic machine learning concepts and Go programming is required to get the best out of this book   Deep Learning with Microsoft Cognitive Toolkit Quick Start Guide Willem Meints,2019-03-28 Learn how to train popular deep learning architectures such as autoencoders convolutional and recurrent neural networks while discovering how you can use deep learning models in your software applications with Microsoft Cognitive Toolkit Key FeaturesUnderstand the fundamentals of Microsoft Cognitive Toolkit and set up the development environment Train different types of neural networks using Cognitive Toolkit and deploy it to productionEvaluate the performance of your models and improve your deep learning skillsBook Description Cognitive Toolkit is a very popular and recently open sourced deep learning toolkit by Microsoft Cognitive Toolkit is used to train fast and effective deep learning models This book will be a quick introduction to using Cognitive Toolkit and will teach you how to train and validate different types of neural networks such as convolutional and recurrent neural networks This book will help you understand the basics of deep learning You will learn how to use Microsoft Cognitive Toolkit to build deep learning models and discover what makes this framework unique so that you know when to use it This book will be a quick no nonsense introduction to the library and will teach you how to train different types of neural networks such as convolutional neural networks recurrent neural networks autoencoders and more using Cognitive Toolkit Then we will look at two scenarios in which deep learning can be used to enhance human capabilities The book will also demonstrate how to evaluate your models performance to ensure it trains and runs smoothly and gives you the most accurate results Finally you will get a short overview of how Cognitive Toolkit fits in to a DevOps environment What you will learnSet up your deep learning environment for the Cognitive Toolkit on Windows and LinuxPre process and feed your data into neural networksUse neural networks to make effcient predictions and recommendationsTrain and deploy effcient neural networks such as CNN and RNNDetect problems in your neural network using TensorBoardIntegrate Cognitive Toolkit with Azure ML Services for effective deep learningWho this book is for Data Scientists Machine learning developers AI developers who wish to train and deploy effective deep learning models using Microsoft CNTK will find this book to be useful Readers need to have experience in Python or similar object oriented language like C or Java   Machine Learning and Deep Learning in Real-Time Applications Mahrishi, Mehul,Hiran, Kamal Kant,Meena, Gaurav,Sharma, Paawan,2020-04-24 Artificial intelligence and its various components are rapidly engulfing almost every professional industry Specific features of AI that have proven to be vital solutions to numerous real world issues are machine learning and deep learning These intelligent agents unlock higher levels of performance and efficiency creating a wide span of industrial applications However there is a lack of research on the specific uses of machine deep learning in the professional realm Machine Learning and Deep Learning in Real Time Applications provides emerging research exploring the theoretical and practical aspects of machine learning and deep learning and their implementations as well as their ability to solve real world problems within several professional disciplines including healthcare business and

computer science Featuring coverage on a broad range of topics such as image processing medical improvements and smart grids this book is ideally designed for researchers academicians scientists industry experts scholars IT professionals engineers and students seeking current research on the multifaceted uses and implementations of machine learning and deep learning across the globe **The Hitchhiker's Guide to Python** Kenneth Reitz,Tanya Schlusser,2016-08-30 The Hitchhiker s Guide to Python takes the journeyman Pythonista to true expertise More than any other language Python was created with the philosophy of simplicity and parsimony Now 25 years old Python has become the primary or secondary language after SQL for many business users With popularity comes diversity and possibly dilution This guide collaboratively written by over a hundred members of the Python community describes best practices currently used by package and application developers Unlike other books for this audience The Hitchhiker s Guide is light on reusable code and heavier on design philosophy directing the reader to excellent sources that already exist **Deep Learning for Engineers** Tariq M. Arif,Md Adilur Rahim,2024-02-28 Deep Learning for Engineers introduces the fundamental principles of deep learning along with an explanation of the basic elements required for understanding and applying deep learning models As a comprehensive guideline for applying deep learning models in practical settings this book features an easy to understand coding structure using Python and PyTorch with an in depth explanation of four typical deep learning case studies on image classification object detection semantic segmentation and image captioning The fundamentals of convolutional neural network CNN and recurrent neural network RNN architectures and their practical implementations in science and engineering are also discussed This book includes exercise problems for all case studies focusing on various fine tuning approaches in deep learning Science and engineering students at both undergraduate and graduate levels academic researchers and industry professionals will find the contents useful **Quick Start Guide to JavaFX** J. F. DiMarzio,2014-04-04 Get started with JavaFX Develop and deploy interactive client applications in no time with help from this practical tutorial from Oracle Press With a focus on working in NetBeans IDE Quick Start Guide to JavaFX explains how to use JavaFX layouts draw shapes use coloring and gradient tools load images apply effects and transformations include animation and embed media You ll also get details on using JavaFX events subclassing existing nodes creating custom nodes working with WebView and styling your applications with CSS Designed for easy learning the book features Key Skills Concepts Chapter opening lists of specific skills covered in the chapter Ask the Expert Q A sections filled with bonus information and helpful tips Try This Hands on exercises that show you how to apply your skills Notes Extra information related to the topic being covered Tips Helpful reminders or alternate ways of doing things Cautions Errors and pitfalls to avoid Annotated Syntax Example code with commentary that describes the programming techniques being illustrated Self tests Chapter ending quizzes to reinforce your skills Mike Meyers' CompTIA A+ Guide to 801 Managing and Troubleshooting PCs, Fourth Edition (Exam 220-801) Michael Meyers,2012-10-30 Essential Skills for a Successful IT Career Written by the leading authority on CompTIA A
