Ionescu, Gabriel Slomovitz, See Keong Soon, IBM Redbooks, 2011-02-13 IBM j type data center solutions running Junos software from Juniper Networks provide operational agility and efficiency dramatically simplifying the network and delivering savings. With this solution a network design has fewer devices interconnections and network tiers. Beyond the cost advantages the design offers the following key benefits: Reduces latency, Simplifies device management, Delivers significant power cooling and space savings, Eliminates multiple system failure points, Performs pervasive security. The high performance data center is built around IBM j type e series Ethernet switches, m series routers and s series firewalls. This new family of powerful products helps to shape the next generation of dynamic infrastructure. IBM j type e series Ethernet switches meet escalating demands while controlling costs. IBM j type m series Ethernet routers are high performance routers with powerful switching and security capabilities. This IBM Redbooks publication targets IT professionals who sell design or administer IBM j type networking solutions. It provides information about IBM j type Ethernet switches and routers and includes the following topics: Introduction to Ethernet fundamentals and IBM j type Ethernet switches and routers, Initial hardware planning and configuration, Other configuration topics including Virtual Chassis configuration, Layer 1, Layer 2 and Layer 3 configurations and security features, Network management features of Junos software and maintenance of the IBM j type series hardware.
