chemists and engineers along with their research managers have long known the difficult nature of formulation problems

This book is a manual to help them to identify key issues design efficient experiments and develop math models to resolve

conflicting objectives Specific solved examples co authored by chemists show how well these methods work on industrial strength problems and document the power and efficiency of computer aided formulation This book is the first one to combine techniques of operations research decision science and statistics to solve formulation problems Readers will appreciate its chapters on experimental design which are easy to read and enjoyable
