Distributions and Kernels discusses partial differential equations involving spaces of functions and space distributions The book reviews the definitions of a vector space of a topological space and of the completion of a topological vector space The text gives examples of Frechet spaces Normable spaces Banach spaces or Hilbert spaces The theory of Hilbert space is similar to finite dimensional Euclidean spaces in which they are complete and carry an inner product that can determine their properties The text also explains the Hahn Banach theorem as well as the applications of the Banach Steinhaus theorem and the Hilbert spaces The book discusses topologies compatible with a duality the theorem of Mackey and reflexivity The text describes nuclear spaces the Kernels theorem and the nuclear operators in Hilbert spaces Kernels and topological tensor products theory can be applied to linear partial differential equations where kernels in this connection as inverses or as approximations of inverses of differential operators The book is suitable for vector mathematicians for students in advanced mathematics and physics **Topological Vector Spaces** Francois Treves,1967 **Topological Vector Spaces** ,1967
