## Attachments

Using the correct attachment for a particular job is a deciding factor when it comes to the capacity of the machine.

The machines have either direct-mounted attachments or attachments mounted in a bracket which allows rapid changes of attachments.

When choosing attachments, follow the recommendations in the Attachment catalogue or documents issued by Volvo CE. Because of great variations in for example usage, material and working environment, one may deviate from these recommendations. In such cases, the Volvo CE dealer should first be contacted for further information and approval. You are yourself responsible for the safety regarding the combination of machine + attachment and also that the national safety requirements are met.

- With effect from 1st Jan. 1990 the EU-Machine Safety Directive applies and this is stated on the product plate of the machine by the way of a CE marking. This marking therefore also covers the attachments which are designed by Volvo CE, as they are an integrated part of the machine and adapted to the machine. Volvo CE is not responsible for attachments manufactured by other companies. Such attachments must be CE marked and accompanied by a Declaration of Conformity and user instructions.

## Attaching and disconnecting attachments

**WARNING!**

Never use an attachment until you have checked that it is securely fastened and that the attachment including hydraulic hoses, connections and similar are undamaged – your safety is involved.

- Make sure that the hydraulic oil in the attachment, which is to be connected, is not contaminated (foreign particles, water etc.) and that it is of the same quality as that of the machine it will.

**WARNING!**

Check that the attachment is properly locked by pressing the front edge of the attachment against the ground, so that the front end of the machine begins to rise slightly, see the figure below.

If you are uncertain as to whether the attachment is securely locked, you must visually check that the locking pins of the attachment bracket are in the locked position.
