

The image shows the front cover of a DVD box set for the TV series 'Dexter'. The main visual is a close-up of the character Dexter Morgan, played by Michael C. Hall. He is wearing his signature white latex gloves and has a serious, contemplative expression, looking slightly to the left. His right hand is raised, with his fingers resting near his mouth. The background is a plain, light color. The title 'DEXTER' is printed in large, bold, red capital letters across the lower half of the cover. There are several red blood splatters scattered across the bottom half of the image, particularly around the title and the character's hand. A yellow oval sticker is located on the left side, containing text about the release date. At the very bottom, a red banner contains white text indicating it is a Wal-Mart exclusive and includes the first two episodes of the season.

Dexter Morgan. A Moral Murderer? Antonia Gesche, 2021-04-07 Bachelor Thesis from the year 2018 in the subject Communications Movies and Television grade 1.0 University of Dusseldorf Heinrich Heine Anglistik und Amerikanistik language English abstract This bachelor thesis aims to answer the following research question Is it possible to morally

absolve Dexter not only from a utilitarian and a Kantian point of view but are there also aesthetical aspects influencing and reinforcing the viewer's attitude. As the question consists of two parts the analysis will correspondingly be carried out in two steps. The first part will investigate if the viewer is enabled to morally justify Dexter's behavior by positively identifying with him and if this dynamic is supported and reinforced by stylistic devices such as framing and mise en scene. The second part will investigate Dexter's activities on the basis of the two abovementioned ethical theories and apply these to a selection of scenes from various seasons of the series. Unlike the article from dexterdaily.com which suggests that Dexter may be morally absolved by both utilitarianism and Kant's ethical theory a preliminary assumption of this thesis is that Dexter might be offered moral amnesty by utilitarianism rather than by Kant.

Text Typology and Translation Anna Trosborg, 1997-01-01

This book breaks new ground in translation theory and practice. The central question is: In what ways are translations affected by text types? The two main areas of investigation are:

A. What are the advantages of focusing on text types when trying to understand the process of translation? How do translators tackle different text types in their daily practice?

B. To what extent and in what areas are text types identical across languages and cultures? What similarities and dissimilarities can be observed in text types of original and translated texts?

Part I deals with methodological aspects and offers a typology of translations both as product and as process. Part II is devoted to domain specific texts in a cross cultural perspective while Part III is concerned with terminology and lexicon as well as the constraints of mode and medium involving dubbing and subtitling as translation methods. Sonnets, sagas, fairy tales, novels and feature films, sermons, political speeches, international treaties, instruction leaflets, business letters, academic lectures, academic articles, medical research articles, technical brochures and legal documents are but some of the texts under investigation. In sum, this volume provides a theoretical overview of major problems and possibilities as well as investigations into a variety of text types with practical suggestions that deserve to be weighted by anyone considering the relation between text typology and translation. The volume is indispensable for the translator in his/her efforts to become a competent text aware professional.
