The Ec Common Fisheries Policy:

The EC Common Fisheries Policy Robin Churchill, Daniel Owen, 2010-03-04 The Common Fisheries Policy CFP is one of the longest established and more controversial of the common policies of the EC It deals principally with the management of fishery resources relations between the EC and third States in fisheries matters the marketing of and trade in fishery products financial assistance to the fisheries sector and aquaculture However the CFP is not just a matter for those with an economic interest in fisheries It also raises many issues of more general concern such as the capacity of the EC and its Member States to manage important natural resources sustainably the impact of fishing on the wider marine environment and relations between developed and developing States This book addresses the CFP from a legal perspective It provides a detailed account of the very large body of EC law comprising the CFP and draws on the European Commission's associated documents to aid interpretation and add context As a result the book will be of value to anyone wanting knowledge of the law of the CFP Although not addressing the Commission's 2009 Green Paper on reform of the CFP the book should provide a useful reference point against which to view the reform of parts of the CFP that is anticipated to take place over the next few years

Quo Vadis Common Fisheries Policy? Ernesto Penas Lado, 2019-09-10 Offers a guide and provides an analysis of how a public European fisheries policy should be evaluated implemented and reformed Quo Vadis Common Fisheries Policy is an essential book that provides an authoritative guide to the future challenges that face the public European fisheries policy Written by a noted expert with 30 years experience in fisheries policies the book provides the information needed to analyze how a public EU policy should be evaluated implemented and reformed The book examines the difficulties of implementing the new policy

including the application of the objectives of the 2013 policy reform The author explores the myriad challenges that face the new policy due to global warming pollution and other global drivers The book compares the new policy with other fisheries policy particularly with the United States fisheries policy under the Magnusson Stevens Act The book offers an opportunity to address and discuss the challenges and obstacles that are not currently in the public domain This important book Provides a unique view from a noted expert and former policy insider Offers a critical analysis of a public EU policy from a pro European standpoint Gives a foundational resource to aid in the debate on the future of the Common Fisheries Policy Includes topics that go beyond EU s policy and have implications for fisheries management around the world Written for administrations and stakeholders in the European and international fishing industry Quo Vadis Common Fisheries Policy addresses the challenges of EU s new fisheries policy and offers a comparison of the US fisheries policy The book helps foster much needed debate about this topic

The Common Fisheries Policy of the European Community Mark Wise,2025-12-29 Disputes over fishing rights stir national feelings despite the modest socio economic importance of fishing in most member states The Common Fisheries Policy of the European Community 1984 takes an impartial view in examining the development of the European Community s Common Fisheries Policy from its obscure origins in the 1960s to its reform in the 1980s In doing so it draws together the major characteristics of Europe s diverse national fishing industries and not only sheds light on the complex and often poorly understood workings of the EC itself but also describes the almost insuperable political problems of allocating and conserving an important international resource

The Common Fisheries Policy in the European Union Eugénia da Condeição-Heldt,2004-03-01 The purpose of this book is neither to duplicate overviews of the Common Fisheries Policy CFP nor to recapitulate narrative treatments of the European integration process The aim is to comprehend how EU negotiations work theoretically and empirically so that a conceptual framework for analyzing EU international negotiations will be provided and juxtaposed to two key negotiations leading to the establishment of the CFP

Reforming the Common Fisheries Policy Jill Wakefield,2016-06-24 This book takes a critical view of the policy and law governing EU marine fisheries and the effect of the 2013 reform of the Common Fisheries Policy CFP Reforms to the CFP are impeded by Treaty guaranteed concessions exemptions from general environmental legislation and the Court of Justice s creation of principles unique to the sector The author discusses how damaging effects of fishing could be ameliorated if the Court were to align fisheries principles with general principles of law and considers the institutional and regulatory frameworks needed to encourage prudent resource use

The EC Common Fisheries Policy Robin Churchill,Daniel Owen,2010-03-04 The Common Fisheries Policy CFP is controversial and is widely blamed both for the poor state of Europe s fish stocks and the woes of its fishermen This book lays out in detail the varied roles and responsibilities of the EU under the CFP examining both the law and the policy issues crucial to understanding its operation

The New Common Fisheries Policy Commission of the European Communities. Directorate-General for Fisheries,1994

The Common Fisheries Policy M J Holden,David

Garrod,1996-10-07 The Common Fisheries Policy CFP of the European Community consists of four inter related policies markets structures external fishery relations and conservation The original hardback edition concentrated on the conservation policy because it generated the most controversy which continues to intensify as fish stocks deteriorate For many the conservation policy is the Common Fisheries Policy and apparently a disastrous failure Mike Holden joined the Commission in 1979 and was closely involved with the CFP s development negotiation and adoption in 1983 and its subsequent implementation He was therefore in a unique position to provide a critical appraisal of its successes and failures and requirements to improve its performance in the future but died in December 1995 David Garrod who has provided an update to take account of the latest developments is less optimistic He reviews recent developments in the context of the ownership of resources and enforcement and the attitudes of the main players He concludes that a radical rethink of the conventional approach to fisheries management is necessary if the EC is to avoid the charge of resource collapse and the loss of much of the EC domestic fish production *The Common Fisheries Policy* Commission of the European Communities. Directorate-General Information, Communication, Culture,1986 **The Common Fisheries Policy** Commission of the European Communities. Directorate General of Information,1983 *Reviewing the Common Fisheries Policy* Chris Grieve,2001 *European Fisheries Law* Till Markus,2009 The EC s Common Fisheries Policy CFP was established to ensure that the exploitation of living aquatic resources in EC waters and by EC fisheries is carried out at sustainable levels However since its inception in 1970 the CFP has pursued conflicting objectives On one hand it has tried to manage fisheries by establishing and implementing a complex system of conservation control and enforcement measures On the other hand it has heavily subsidized its fisheries sector to secure food supplies increase employment and the sector s competitiveness as well as to further economic development in coastal regions Given that many fish stocks exploited by EC fisheries are overfished and catches continue to decline it could be argued that EC management and promotion measures have generally failed Conservation measures such as total allowable catches effort restrictions and technical measures often encourage fishing at unsustainable levels Control and enforcement measures have lacked effectiveness On the other hand in many cases subsidies have increased fishing and processing capacities of the EC s fisheries industry High capacity in the sector however demands high catch rates thus putting pressure on marine capture resources It has only been recently that the CFP has really begun to adjust its support practices to correspond to the situational and legal management requirements Nevertheless such subsidization continues even under the new European Fisheries Fund This book a explains and make accessible the CFP s complex management and promotional regimes b identifies problems and failures in both systems c assesses whether CFP measures are coherent as well as consistent with higher ranking law and d finds out how consistency between promotion and management can be increased **Progress of Reform of the Common Fisheries Policy** Great Britain. Parliament. House of Lords. European Union Committee,Select Committee On The European Union,2003 The Committee s report finds that the

promising reform proposals for the EU Common Fisheries Policy CFP recommended by the European Commission in May 2002 were seriously compromised by decisions taken by the Agriculture and Fisheries Council in December 2002 as a result of special pleading by EU Member States Despite some positive aspects the Committee has no confidence that the CFP regulation agreed upon will deliver sustainable fisheries management nor will it prevent the irreversible decline in key fish stocks particularly cod and hake unless it is substantially improved The setting of total allowable catches TAC levels and EU funding for construction of new fishing vessels are also criticised The report argues that transitional financial aid linked to stock recovery plans is needed to promote diversification of coastal economies and the development of alternative employment opportunities

Enforcing the Common Fisheries Policy Ronán J. Long, Peter A. Curran, 2008-04-30 The main focus of this book is a review of how the Common Fisheries Policy is enforced throughout the Community with a discussion of its successes and failures Topics include the various rules and policies to be enforced the enforcement authorities in the Member States and their activities and strategies the role of the Commission and its approach to enforcement new developments in fisheries control the costs of enforcement and problem fisheries and non compliance generally *Iceland, Norway and the EC Common Fisheries Policy*, 2003

EU proposals for reform of the Common Fisheries Policy Great Britain: Parliament: House of Commons: Environment, Food and Rural Affairs Committee, 2012-02-24 In this report the Environment Food and Rural Affairs Committee concludes that radical reform is needed to ensure that the Common Fisheries Policy CFP delivers for the fish the fishermen and the coastal communities that depend on them The widespread desire to deliver a more local approach to fisheries management is hampered by the EU's exclusive competence over the conservation of marine resources under the CFP as only the EU can make rules regarding fisheries conservation The Commission has baulked at repatriation of fishing policy through a full scale Treaty change but the Committee highlights an alternative this can be done by amending the CFP regulation itself This approach would give Member States genuine freedom and responsibility and would set clear boundaries to the Commission role The Commission also wants to implement a discard ban on many commercial species starting in 2014 but the MPs question whether the proposal will prove effective Instead the Committee argues for a more gradual approach built on a sound science base and the local experience of fishermen to find workable solutions to the discard problem that has blighted European fisheries The Committee also urges Defra not to abandon its commitment to domestic fisheries reform that delivers a fairer deal to small scale fishermen The Committee proposes a novel mechanism to reallocate unused fishing rights from slipper skippers to active fishermen a topic that was covered in an earlier report on the CFP and domestic fisheries management sixth report of session 2010 12 HC 858 ISBN 9780215559944

Challenges and Opportunities for the EU Common Fisheries Policy Application in the Mediterranean and Black Sea Simone Libralato, Francesco Colloca, Ali Cemal Gücü, Christos D. Maravelias, Cosimo Solidoro, Sebastián Villasante, Massimiliano Cardinale, 2019-01-11 The application of the Common Fisheries Policy CFP in the

Mediterranean and Black Sea faces several challenges also because of large ecological economic political and institutional differences across the basin The challenge of CFP application is exacerbated by the legal administrative situation with large areas outside national EU jurisdictions by the different development of fisheries that result in fleet capacities highly different on opposite shores of some sub basins as well as by uneven monitoring and data availability across the basins that result in situations that hamper sustainable management This book collates analyses related to the application of the principles included in the CFP in Mediterranean and Black Sea including assessments of current status scenario analyses visions of best solutions evaluation of critical hot spots and effects of regionalization of fisheries management The eBook tackles from local to transboundary issues and solutions and provides a broad vision of problems together with important practical solutions for CFP application in the Mediterranean and Black Sea *The Future of the Common Fisheries Policy* European Commission,2001 **COMMON FISHERIES POLICY.** COMMISSION OF THE EUROPEAN COMMUNITIES.
