**Women in Charge (Routledge Revivals)** Robert Goffee,Richard Scase,2015-06-11 Why do women start their own businesses Is it solely because they are searching for financial success or for other reasons On the basis of detailed interviews with a number of women who have started their own businesses this book first published in 1985 reveals the significance of factors that are directly related to women's experiences at home at work and in the wider society The author's analysis shows how business start up enables many women but not all to achieve forms of economic and social independence that they would not otherwise enjoy Further they illustrate ways in which business proprietorship has a wide variety of effects upon individuals and upon their personal relationships and life styles They refute the notion of a single entrepreneurial experience and argue that the causes and consequences of business start up are highly conditioned by the extent to which women are committed to traditionally prescribed roles and to profitability The findings of this book will have important implications for the formulation of small business policies It will also be of particular value to those interested in women's studies and small business management **A Feminist Manifesto for Education** Miriam E. David,2016-09-26 The idea that gender equality in education has been achieved is now a staple of public debate As a result educational policies and

practices often do not deal explicitly with gender issues such as sexual abuse harassment or violence Exaggeration of neoliberalism's successes in creating individual opportunity in education conceals ongoing problems and ignores the continuing need for a fair and equal education for all regardless of gender or sexuality In this manifesto for education Miriam David rejects the notion that gender equality has been achieved in our age of neoliberalism She puts the focus back onto issues such as changing patterns of women's and girls' participation in education across the globe feminist strategies for policy and legal interventions around human rights and violence against women and children She discusses waves of feminism linked to school teaching and pedagogies in higher education as well as an illuminating case study of an international educational programme to challenge gender related violence Revealing neoliberal education to be misogyny masquerading as metrics Miriam David argues for changes in the patriarchal rules of the game including questioning gender norms and stereotypical binaries and for making personal social health and sexuality education mainstream
