Creative Intelligence in the 21st Century Don Ambrose, Robert J. Sternberg, 2016-07-15 How can creative individuals and societies adapt to complex 21st century conditions? Will civilizations thrive or collapse in the decades to come if they are not creative enough or if they are too creative? Interest in these questions is growing, however until now there has been inadequate understanding of the socioeconomic and cultural trends and issues that influence creativity. This book provides that understanding while yielding insights from many of the world's leading creativity researchers and educational experts. The book begins with a big picture interdisciplinary overview of the socioeconomic, cultural, and technological pressures emerging from 21st century globalization and describes some ways in which those pressures simultaneously suppress, distort, and invigorate creativity in general and creative education in particular. After that, prominent scholars of creativity and education use their impressive knowledge bases to clarify how we can adjust our thoughts and actions in order to give ourselves the best possible chances for success in this complex world. The world's problems are complex, messy, and seemingly intractable, but history tells us that human creativity finds solutions to even the most daunting problems. This book collects perspectives on creative development from many of the most respected scholars and educators working in creativity and innovation today, helping chart a path forward for creativity in the 21st century.

Jonathan Plucker, Julian C. Stanley, Endowed Professor of Talent Development, Johns Hopkins University. Teaching the Entrepreneurial Mindset Across the University Lisa Bosman, Stephanie Fernhaber, 2021-10-07. It stretches no point to suggest that creativity, innovation, and risk-taking will decide our future societal prosperity. We cannot spread those values too widely, so having taught engineering faculty in their first book, these authors now aim to boost the spirit across all disciplines. What a great success for all of us if they succeed. Mitchell E. Daniels Jr., president of Purdue University and former governor of Indiana. Despite the relevancy of the entrepreneurial mindset for all career paths, only a small percentage of the higher education student population takes part in entrepreneurially minded learning opportunities. This gap can be attributed to several factors. From a program perspective, many degrees are already at credit capacity, which allows limited room in the existing curriculum to add new courses. From a student perspective, entrepreneurship education is thus positioned as optional and requires extra time and, in some cases, tuition to do so. Finally, from an educator perspective, the majority of faculty members across the university have not been trained in entrepreneurship and may not know where to start. Teaching the Entrepreneurial Mindset Across the University: An Integrative Approach overcomes these challenges by providing higher education faculty with a toolkit including tips and strategies to integrate the entrepreneurial mindset into existing courses regardless of discipline. The book is broken into three core parts: Motivation, The importance of the entrepreneurial mindset for all students is established; Design, The Entrepreneurial Mindset Teaching Blueprint is introduced as a tool for integrating entrepreneurially minded curricular learning experiences within existing courses; Application, Example entrepreneurially minded curriculum from across the university are provided. By integrating the entrepreneurial mindset across the curriculum, students from all disciplinary backgrounds will be better prepared to enter the workforce, solve complex social issues, and leverage entrepreneurial thinking in their everyday lives. This book is meant for educators who want to make an impact and truly prepare graduates for the real world. *Creative Mavericks: Beacons of Authentic Learning* Sue Haynes, 2007-06-29. For over thirty years, Sue Haynes has taught highly creative children who resist standardized learning and who are often mislabeled ADD and/or learning disabled. Through supporting their creative expression, she has developed an alternative lens through which she sees their unique strengths. Through this lens, Sue sees not disabled learners but talented, intuitive individuals who exhibit a passion for learning, what intrigues them, and a drive to express their learning in creative ways. These learners are compelled to be true to their inner agendas and thus resist curriculums that lack personal relevance. Sue has discovered that creatively gifted learners, and indeed all learners, need the freedom and support to learn through intuitive knowing and creative expression in order to maximize their potential. Sue's book about her theories and experiences, *Creative Mavericks: Beacons of Authentic Learning*, consists of three sections. Section One includes *Who is the Creatively Gifted Learner*, which explores the attributes of highly creative learners, and *Seeing Through a Different Lens: Facilitating the Creatively Gifted Learner*, which

describes her teaching Section Two Heartsongs The Struggles and Triumphs of Creatively Gifted Learners includes the stories of twelve individuals who share reflections on their schooling and the fruition of their creative empowerment Section Three Implications of Education for Creatively Gifted Learners Awakening Passion and Authenticity in All Learners further explores the conditions which foster learning empowerment through the reflections of nine innovative classroom teachers These teachers reveal that the passion and creative expression so evident in highly creative learners are seeded within all learners and can be awakened by teaching which honors the uniqueness of each individual Sue s hope is that Creative Mavericks may inspire an exploration of teaching and learning that moves beyond the confines of standardized education and empowers our true potential
