, 2005 **The Politics of Global Competitiveness** Paul Cammack, 2022 Marx predicted in Capital 1867 that as capitalism became global patterns of work would be transformed and workers would need to develop versatility flexibility and mobility This general law of social production as he called it is now in evidence all around us in global value chains zero hours contracts and contract work organised through digital platforms It results from competition between capitalists scientific and technological revolutions in production and incessant advances in the division of labour as production processes are broken down into ever smaller steps This book documents the leading roles of the Paris based Organisation for Economic Cooperation and Development and the Washington based World Bank as advocates of these developments They do not as generally supposed simply represent the interests of the advanced economies or the West and their transnational corporations They promote a single global model of capitalist development without limits and on a genuinely global scale It calls upon all states to adjust continually to the structural and social demands of competitiveness which they see as essential to the global hegemony of capital over labour The OECD and the World Bank propose policies that give girls and women

equal access to education and paid work reform welfare to make work pay introduce flexible labour contracts that make hiring and firing easier focus education on skills that boost employability and draw workers in the developing world from the informal sector into the formal sector where they can be more productive This is the politics of global competitiveness

Blame it on the WTO? Sarah Joseph,2011-04-14 The WTO is often accused of not paying enough attention to human rights This book weighs these criticisms and examines their validity both from a legal and from political and economic points of views It asks whether the WTO is under an obligation to construct a fairer trade system and discusses suggestions for reform

World Development Report 2007 Emmanuel Jimenez,World Bank,2006 Developing countries which invest in better education healthcare and job training for their young people between the ages of 12 and 24 years of age could produce economic growth and sharply reduced poverty With 1.3 billion young people now living in the developing world the largest ever youth group in history the report says there has never been a better time to invest in youth because they are healthier and better educated than

previous generations and they will join the workforce with fewer dependents because of changing demographics The report says that young people make up nearly half of the ranks of the world s unemployed and as for example in the Middle East and North Africa region must create 100 million jobs by 2020 in order to stabilize its employment situation Moreover surveys of young people in East Asia and Eastern Europe and Central Asia carried out as research for the report indicate that access to jobs along with physical security is their biggest concern Far too many young people some 130 million 15-24 year olds cannot read or write Secondary education and skill acquisition make sense only if primary schooling has been successful This is still far from being the case and efforts have to be reinforced in this area In addition more than 20 percent of firms in countries such as Algeria Bangladesh Brazil China Estonia and Zambia rate poor education and work skills among their workforce Overcoming this handicap starts with more and better investments in youth The report highlights three areas to promote better investment in the future expanding opportunities enhancing capabilities and providing second chances Expanding opportunities focuses on increasing the quality of education smoothing the transition to work and providing young people with a platform for civic engagement Enhancing capabilities involves making young people aware of the consequences of their actions especially consequences that will affect them much later in life as well as building their decision making skills and giving them the right incentives Providing second chances calls for helping young people recover from missed opportunities through remedial education retraining treatment and rehabilitation *Equity and Development* Gudrun

account of aid warts and all Foreign aid is now a 100bn business and is expanding more rapidly today than it has for a generation But does it work Indeed is it needed at all Other attempts to answer this important question have been dominated by a focus on the impact of official aid provided by governments But today possibly as much as 30 percent of aid is provided by Non Governmental Organizations NGOs and over 10 percent is provided as emergency assistance In this first ever attempt to provide an overall assessment of aid Roger Riddell presents a rigorous but highly readable account of aid warts and all Does Foreign Aid Really Work sets out the evidence and exposes the instances where aid has failed and explains why The book also examines the way that short term political interests distort aid and disentangles the moral and ethical assumptions that lie behind the belief that aid does good The book concludes by detailing the practical ways that aid needs to change if it is to be the effective force for good that its providers claim it is This volume is a valuable resource and an important contribution to the literature on foreign aid Social and Behavioral sciences Riddell provides a compelling and thorough account of the intricacies of foreign aid International Affairs an excellent and significant book Alex De Waal Times Literary Supplement everything anyone might want to know about the subject Nigel Grimwade Times Higher Education Supplement For anyone who wants to know more about development assistance this is a must read Roger Riddell provides us with a nuanced and honest outline of past and current aid flows their complexities trends and possible impact Does aid really work His answer is a conditional cautious yes And he presents some bold proposals to address some of the systemic weaknesses It was strong international leadership that delivered the aid reforms of the 90 s The question is whether the current leaders in development are ready for this debate Hilde Frafjord Johnson former Minister of International Development of Norway In this impressive new study Riddell has surpassed even his distinguished Foreign Aid Reconsidered It includes a rare and much needed analysis of emergency and voluntary assistance Complete and authoritative the book will have a long life as the definitive account of its important subject Professor Robert Cassen London School of Economics This book is a heroic achievement Not only has Roger Riddell mapped out with great clarity the arcane world of international aid in a way that will help the practitioner as much as the general reader he has also produced visionary and challenging recommendations for reform of the system Sir Michael Aaronson former Director General of Save the Children UK Beating the Odds M.
