**A Cure Too Far** Mugenyi, Peter, 2013-12-07 *A Cure Too Far* takes the reader back to the bleak time in Africa when doctors stood by helplessly and watched in horror as their distraught patients were hijacked by a ragtag army of cocky healers. It describes an obstacle strewn struggle to stop peddlers of fake AIDS drugs and other detractors while trying to find a scientifically proven solution to alleviate the carnage. This story is informed by incredible personal accounts of individuals who played different roles in the war for survival and of those who found the agony too much to bear as the relentless scourge ripped apart thousands of years of cultural practices. Even when hope appeared in January 2003 through the President's Emergency Programme for AIDS Relief PEPFAR, a devastating financial crunch hit threatening to undo all that had been achieved.

*Law, Religion, Health and Healing in Africa* M. Christian Green, Faith Kabata, Fortune Sibanda, 2022-12-31. The Covid 19 pandemic was global in its spread and reach as well as in its medical, social and economic effects. In many respects the global effort to flatten the curve produced a flattening of experience around the world and a striking coincidence of similar experiences in countries the world over. The identity, simultaneity and uniformity of experience were also manifest in common concerns at the intersection of law and religion in many nations around the world, including Africa. The lockdowns and closure of religious worship centres, churches, mosques and religious organisations of all sorts raised questions of freedom of religion and the related concern for freedom of assembly along with concerns about the relation of religion to science and public health, religious channels of communication and religious provision of social services. After all, health, communications and social services are all areas in which African religious organisations play key roles. Potential tensions around these issues raised further considerations about the nature of religion-state relations, the status of religious authority and whether religious and state actors would work together or at odds in addressing the Covid 19 pandemic.

*Indigenous Knowledge of Namibia* Chinsebu, Kazhila C., Cheikh Youssef, Ahmad, 2016-01-29 Indigenous knowledge is the dynamic information base of a society facilitating communication and decision making. It is the cornerstone of many modern day innovations in science and technology. It is also a ready and valuable resource for sustainable and resilient livelihoods and attracts increasing public interest due to its applications in bio technology, health, bioprospecting, pharmaceuticals, agriculture, food preparation, mathematics, and astronomy. *INDIGENOUS KNOWLEDGE OF NAMIBIA* is a fascinating compendium aimed at a wide readership of academics and students, government officials, policy makers, and development partners. The 17 chapters examine the indigenous knowledge of medicinal plants for treating HIV/AIDS, malaria, cancer, and other microbial infections of humans and livestock; indigenous foods, coping and response strategies in dealing with human wildlife conflicts, floods, gender, climate change, and the management of natural resources. A new rationalisation of adolescent customary and initiation ceremonies is recommended in response to the HIV/AIDS pandemic, and a case study of the San people of Namibia speaks to the challenges of harmonising modern education with that of indigenous people. *Acquired Immune Deficiency Syndrome* Gerald James Stine, 1996 The author provides an overview of the most important biological, medical, social, and legal issues related to HIV infection, HIV disease, and AIDS. **Until the Cure** Ann Kurth, Jonathan Mann, 1993-01-01 Although the AIDS epidemic has generated worldwide concern, very little attention has been paid to its impact on the increasing numbers of women who have been infected. Women with HIV disease are in many ways a unique group: their clinical symptoms can differ from those of men, and because they are the ones who bear and usually care for children, they have different psychosocial concerns and needs. This book, written by experts in the fields of law, medicine,

nursing public health social work ethics and psychiatry and enriched by personal accounts from women who have been living with the disease is a guide to the medical and social treatment of women with HIV      Cured Nathalia Holt,2015-02-24
