Nicolaides**

## **The EU Structural Funds:**

**A Creeping Transformation?** Michael W. Bauer, 2001-10-31 How can we approach the Commission's role as co manager of policy implementation Why should we expect the Commission to be pulled into domestic policy execution and to accumulate something like an implementation management capacity How should we conceptualise the Commission's linkage with post decision management issues Finally how does the Commission's involvement in the application of EU policies if any significantly change everything Such questions are answered in this study which is concerned with what may be called the implementation management capacity of the European Commission Simply put this is the role the Commission plays in the implementation of large scale European spending programmes While it is true that the Commission's predominant prerogatives are to draft legislation and facilitate bargaining it also has a role in post decision policy management This role is of increasing importance for the emerging governance of the European Union Readership social scientists journalists and all those interested in the role of the European Commission in shaping EU policies

### **Policy Networks and European**

**Structural Funds** Hubert Heinelt, Randall Smith, 1996 This text looks at the origin and growth of the EU structural funds focusing on the principles of governance in the policy making process of the EU as a developing political system It includes separate case studies of member countries

### **The Impact of EU Structural Funds on Polish Small and Medium-sized**

**Enterprises** Joanna Mastalerek, 2005-02-14 Essay from the year 2005 in the subject Politics Topic European Union grade A Jagiellonian University in Krakow Europaeistik course Business and Markets in Central Eastern Europe language English abstract Poland's accession to the EU in May 2004 is supposed to have positive long term effects on the Polish economy In the short term it has considerably charged Polish companies with the burden of new costs and challenges linked to the EU accession for instance adopting the EU's environmental or quality standards Particularly small and medium sized who are particularly sensitive to the changes in their business environment struggle with the challenges of the EU accession and are seriously concerned by the increased competition on the internal market 1 To cushion up these effects the EU supports Polish SMEs by means of different Community funds whose legal basis can be found in Art 130 130a and 130b of the Treaty of Maastricht stipulating that In order to promote its overall harmonious development the Community shall develop and pursue its actions in leading to the strengthening of its economic and social cohesion encouraging an environment favourable to initiative and to the development of undertakings throughout the Community particularly small and medium sized undertakings The Community shall also support the achievement of these objectives by the action it takes through the Structural Funds European Agricultural Guidance and Guarantee Fund Guidance Section European Social Fund European Regional Development Fund the European Investment Bank and other existing financial instruments

### **Coherence of EU**

**Regional Policy** John Bachtler, Ivan Turok, 1997-05-02 This book brings together a rich selection of up to date practical experience of EU regional policy from across Europe It provides different perspectives on the design and operation of

regional development strategies under the Structural Funds from people closely involved in studying managing or advising on the process at EU national and regional levels It therefore offers a more comprehensive and detailed understanding of the structural policies than has been available hitherto This will prove particularly useful to researchers practitioners and students interested in European regional policies and processes EU Structural Funds and Growth Prospects ,2017 In the financial framework period of 2014 to 2020 for the first time the European Structural Funds represent the main share of the European Union s EU budget Previous evaluations on the funding s effectiveness reveal contradicting results A new and robust RWI study does not find any positive effects of the program on economic growth In fact impacts indicate that highly funded regions might have to overcome structural problems first before growth programs can take effect Also a high intensity of funding in the immediate regional neighborhood has a strongly negative influence on a region s growth prospects

*Managing EU Structural Funds* Frank Bollen,2001 **EU Structural Funds Beyond Agenda 2000** Frank Bollen,Ines Hartwig,Phedon Nicolaides,2000 **EU Structural Funds** Commission of the European Communities,1999 The origins and the scope of the cohesion fund in the European Union Dora Pinheiro Brites Correia,1996 **Reform of the Structural Funds** Anne-Marie Mouradian,1992 *The E.U. Structural Funds* Andrew Evans,1999 For the years 2000 to 2006 spending up to Euro 218.4 billion is proposed BOOK JACKET **EU Structural Funds and Regional Income Convergence** Philipp Breidenbach,Timo Mitze,Christoph M. Schmidt,2016 The European Structural and Investment Funds ESIF are the prime instrument of EU regional policy European policy makers place considerable hope into their growth stimulating funding measures to overcome current economic stagnation Consequently there is a strong need for credible evidence regarding the programs effectiveness Based on an empirical identification strategy linked to modern growth theory we find that the disbursement of EU structural funds is negatively correlated with regional growth Incorporating spatial dynamics and decomposing this correlation into a direct and a spatially indirect component it is particularly the latter which determines this sobering finding Regarding the economics behind these results the obtained negative spatial effect may reflect the role played by policy induced spatial competition among neighboring regions It could also highlight the backwardness in technological endowment and economic structures of highly funded regions In any case EU structural funding does not seem to contribute effectively to foster income convergence across regions Guide to the Reform of the Community's Structural Funds Commission of the European Communities,1989 Additionality and Regional Development Chiara Del Bo,2016 This paper deals with the effects of the transfer of additional funds on the real economy of recipient countries in particular the European Member States The intended and unintended effects of additional funds on national public finances and ultimately economic performance are discussed Understanding the real effects of additional public funds and the possible complementarity or substitutability with national public finance is important for shaping the policies for the allocation of Structural Funds Verification of additionality plays a role in ensuring that additional funds are used to effectively

complement national expenditure programmes In the case of the European Union it is widely recognised that the current verification mechanism is affected by weaknesses that prevent it from providing reliable and useful data to effectively assess additionality For this reason the paper suggests the European Commission to move away from the current verification approach and to adopt a new one that could more effectively assess to what extent the Structural Funds complement national investments

*EU Structural Funds in the Baltic Countries - Useful Or Harmful?* Urmas Varblane, 2017 The current article is focused on the role of financial assistance from the European Union in the budgets of the three Baltic countries They all have seriously benefitted from the support of EU structural funds which have reached close to five per cent of their GDP Based on the case of higher education research funding the article argues that the Baltic countries overlook the additionality principle of the European Union cohesion policy Structural funds are replacing the Baltic countries own funding During the current EU programming period between 2014 and 2020 the exit strategies should be prepared by the governments of Baltic countries in order to be able to finance research with significantly lower support from EU cohesion funds The precondition is that instead of a short run view in the coalition treaties of the Baltic governments a long term strategy for how to move toward knowledge intensive economies is also needed The first and most urgent need is to improve the quality of use of the EU support funds by all three countries in order to support longrun productivity growth and increase the competitiveness of the Baltic countries

*European Regional Development Fund* Great Britain: Parliament: House of Commons: Communities and Local Government Committee, 2012-07-13 The abolition of the Regional Development Agencies removed the main source of match funding for ERDF sponsored projects and the economic downturn has curbed alternative options for match funding even further There is a pressing need to spend each region s ERDF allocation before 2015 but unless ministers take urgent steps to deliver on the Government s promise to make it easier for projects to secure match funding through the Regional Growth Fund there is a significant risk that value for money will suffer and ERDF will not make the impact it could to help rebalance the UK s economy The Committee endorses a number of sensible rule changes that will govern the next ERDF round 2014 20 currently proposed and related proposals to give Member States the power to tailor the size of their Operational Programme areas which could permit Local Economic Partnerships in England to take responsibility for managing EU funds MPs also challenge the current allocation system where even the wealthiest Member States receive some ERDF funding when a portion of what they pay in originally gets recycled back to them The cross party group of MPs calls for this circular money flow to end and for England to retain this portion of funding to deliver its own regional policy The Government would have to guarantee the same level of funding across the EU s 7 year funding cycle This change would not affect the Government s contribution to ERDF for the poorer Member States Lastly MPs challenge the Government to evaluate the value for money of ERDF funded projects

*European Structural and Investment Funds 2014-2020* ,2015 The European Structural and Investment ESI Funds make available more than EUR 450 billion in 2014 2020 to support Member

States and regions efforts towards the Europe 2020 strategy as well as to promote economic social and territorial cohesion sustainable development of rural and maritime areas and sustainable management of natural resources Compared to 2007 2013 cohesion policy this new framework proposes a number of new mechanisms to ensure the ESI Funds deliver on their objectives a sound strategic approach through Partnership Agreements and programmes thematic concentration the performance framework ex ante conditionalities a closer link to European economic governance increased opportunities for the use of financial instruments support to institutional capacity minimum shares for ESF contribution and a Youth Employment Initiative specifically set out to combat youth unemployment This guide covers the texts of the main regulations in force Common Provisions Regulation European Regional Development Fund European Social Fund Cohesion Fund European Agricultural Rural Development Fund European Maritime and Fisheries Fund and European Territorial Cooperation and presents a commentary on each one Cost Benefit Analysis and Incentives in Evaluation Massimo Florio,2007-10-26 This book provides an authoritative contribution to applied cost\_benefit analysis CBA and other evaluation methods in the context of the regional policy of the European Union Through the use of Structural Funds and other financial and regulatory mecs The Utilisation of EU Structural Funds in Greece Melina Vasardani,Dimitra Dimitropoulou,2022 Greece has been a net recipient of significant Community funds over the past 30 years initially under the Integrated Mediterranean Programmes and subsequently under five programming periods contributing funding to three national Community Support Frameworks from 1989 to 2006 the National Strategic Reference Framework 2007 2013 and the Partnership Agreement for the Development Framework PA 2014 2020 The objective of this article is twofold First to describe in a simple and coherent manner the EU s framework and strategies for investment in the wake of the global financial crisis and the European debt crisis Second to report the progress achieved in the implementation of the PA 2014 2020 in Greece until early 2018 relative to past programming periods or other EU Member States providing at the same time more detailed information about individual operational programmes and approved projects Furthermore the article presents the key structural reforms that were implemented to boost investment and accelerate the absorption of EU funds as laid out in the three economic adjustment programmes from 2010 to 2018 Last but not least it seeks to evaluate the opportunities and the challenges for more effective absorption and utilisation of EU funds **EU Structural Funds and GDP Per Capita** Sergio Destefanis,Valter Di Giacinto,2023

As recognized, adventure as competently as experience very nearly lesson, amusement, as without difficulty as settlement can be gotten by just checking out a book **The E U Structural Funds** plus it is not directly done, you could say yes even more re this life, concerning the world.

We manage to pay for you this proper as capably as easy way to acquire those all. We have enough money The E U Structural Funds and numerous books collections from fictions to scientific research in any way. in the course of them is this The E U Structural Funds that can be your partner.
