Index vii The MINDSTORMS Robotics Invention System from LEGO is a new kind of toy. True to its heritage it contains a  
generous assortment of LEGO pieces that snap slide and click into place with amazing simplicity. Nearly all of the pieces can  
interlock with one another sometimes in rather unusual ways. What sets MINDSTORMS apart however is LEGO's  
Programmable Brick called the RCX. Sensors and motors can be attached to the RCX again with LEGO's hallmark simplicity  
and suddenly the RCX brings a LEGO model to life. It not only moves but also senses and responds to its environment.  
Robotics itself is nothing new. Industrial robots have been in use for years and are constantly getting more sophisticated.

*FIRST LEGO League* James Floyd Kelly, Jonathan Daudelin, 2008 Provides information on the workings and structure of a  
FIRST LEGO league competition covering such topics as organizing a team, finding equipment and funding, designing and  
building robots and using strategies and techniques to increase scores
