World Sound William Bragg:

Half-Hours with Great Scientists Charles G. Fraser, 1948-12-15 The present age is sometimes called the Scientific Age This does not imply that every member of the community is an expert scientist far from it It does mean however that the labours of the scientists have given the age certain features which influence the life of every citizen to some degree Accordingly it is desirable that as many as possible should have some understanding of the scientists work of their aims their point of view and their methods If we had a wishing rug or some sort of spare time car that could transport us at will to any place and time we might visit the scientists of every age see them at work listen to their discussions and even take a hand in the proceedings The wishing rug is not available but the literature of science will serve the purpose for anyone who will do the necessary searching reading and thinking Unfortunately some of that literature is decidedly inaccessible To meet the difficulty this book has been written in the hope of bringing some of the most important passages of the literature of science within the reach of everyone Every part of the vast edifice of science is necessarily the work of some human being and most of us become more interested in the building and are able to understand and appreciate it better when we know who were the architects and builders and when how and why they did their work The story of science is a noble epic of the struggle of man from ignorance toward knowledge and wisdom and toward the mastery of nature and of himself One purpose of science is to systematize experience and a knowledge of the story of science has helped many in that process of organization This book therefore offers the reader a cordial invitation to embark on a tour of visits with great scientists to learn from them the parts they played in the advancement of science and of the human race Here is a treasure house of fascinating information for all who are interested in the world around us and the history of man's understanding of it **Discovery**, 1921 The Spectator, 1921 A weekly review of politics literature theology and art *Science Progress*, 1922 Science Progress in the Twentieth Century, 1922 *The New International Year Book* Frank Moore Colby, Allen Leon Churchill, Herbert Treadwell Wade, Frank H. Lindberg, Ronald L. Numbers, 1986 Since the publication in 1896 of Andrew Dickson White's classic *History of the Warfare of Science with Theology in Christendom* no comprehensive history of the subject has appeared in the English language Although many twentieth century historians have written on the relationship between Christianity and science and in the process have called into question many of White's conclusions the image of warfare lingers in the public mind To provide an up to date alternative based on the best available scholarship and written in nontechnical language the editors of this volume have assembled an international group of distinguished historians In eighteen essays prepared especially for this book these authors cover the period from the early Christian church to the twentieth century offering fresh appraisals of such encounters as the trial of Galileo the formulation of the Newtonian worldview the coming of Darwinism and the ongoing

controversies over scientific creationism They explore not only the impact of religion on science but also the influence of science and religion This landmark volume promises not only to silence the persistent rumors of war between Christianity and science but also serve as the point of departure for new explorations of their relationship Scholars and general readers alike will find it provocative and readable *Technical Book Review Index* ,1920 **Elements of Physics** Alexander Wilmer Duff,Henry Townsend Weed,1928 **The Nation and the Athenaeum** ,1920 *The Encyclopaedia Britannica* ,1929 *The Encyclopaedia Britannica* James Louis Garvin,Franklin Henry Hooper,Warren E.
