primarily on either genetic or behavioral causes for obesity however today s research indicates that a strongly integrated program is the best prospect for success in overcoming obesity Furthermore focus on the role of society in establishing an affordable accessible and sustainable program for implementing these lifestyle changes is vital particularly for those in economically challenged situations who are ultimately at the highest risk for obesity Using studies from both neuroscience and behavioral science to present a comprehensive overview of the challenges and possible solutions The brain to society approach to obesity prevention focuses on what is needed in order to sustain a healthy pleasurable and affordable lifestyle Explores the brain to society approach to obesity prevention focusing on an integrative approach to addressing the obesity pandemic Presents both the nueroscientific and the behavioral factors that impact eating habits Identifies the challenges and suggests solutions for altering attitudes toward food on both an individual and a societal level **The American Swedish Monthly** ,1945      *Nutrition Abstracts and Reviews* ,2003      The Northwestern Miller ,1930
