**Animals in Person** John Knight, 2020-08-29 Our relationship with animals is complex and contradictory we hunt kill and eat them yet we also love respect and protect them This ambivalent relationship is further complicated by the fact that we attribute human emotions and intelligence to animals We even go as far as likening them to children and treating them as family members Drawing on a diverse range of case studies *Animals in Person* attempts to unravel our close and fascinating link with the animal kingdom This book highlights the theme of cross species intimacy in contexts such as livestock care pet keeping and the use of animals in tourism The studies draw on data from different parts of the world including New Guinea Nepal India Japan Greece Britain The Netherlands and Australia *Animals in Person* documents the existence of relations between humans and animals that in many respects recall relations among humans themselves

**The Aging Gap Between Species** Anca Ioviță, 2016-12-18 Aging is a puzzle to solve This process is traditionally studied in a couple of biological models like fruit flies worms and mice What all these species have in common is their fast aging This is excellent for lab budgets It is a great short term strategy Who has time to study species that live for decades But lifespan differences among species are magnitudes of order larger than any lifespan variation achieved in the lab This is the reason for which I studied countless information resources in an attempt to gather highly specialized research into one easy to follow book I wanted to see the forest among the trees I wanted to expose the aging gap between species in an easy to follow and logical sequence This book is my attempt at doing just that What are the mechanisms underlying the aging gap between species I intentionally chose to write the answer to this question in plain English Aging research is too important to hide it behind the closed doors of formal scientific jargon This book could not have existed if green tea libraries and the Internet were not invented The amount of data I had to browse in order to keep the essential patterns is huge Yet this book is not exhaustive This is not a dry academic textbook I tried to instill life in a topic that is hugely important for the extension of human lifespan Only you can decide if I achieved this
