any scholar within the social sciences [The SAGE Handbook of Qualitative Geography](#) Dydia DeLyser, Steve Herbert, Stuart Aitken, Mike Crang, Linda McDowell, 2009-11-18 Exploring the dynamic growth, change and complexity of qualitative research in human geography The SAGE Handbook of Qualitative Geography brings together leading scholars in the field to examine its history, assess the current state of the art and project future directions. In its comprehensive coverage, accessible text and range of illustrative studies past and present, the Handbook has established an impressive new standard in presenting qualitative methods to geographers. David Ley (University of British Columbia) Moving beyond textbook rehearsals of standard issues, the Handbook shows how empirical details of qualitative research can be linked to the broader social, theoretical, political and policy concerns of qualitative geographers and the communities within which they work. The book is organized into three sections. Part I, Openings, engages the history of qualitative geography and details the ways that research and the researcher's place within it are conceptualized within broader academic, political and social currents. Part II, Encounters and Collaborations, describes the different strategies of inquiry that qualitative geographers use and the tools and techniques that address the challenges that arise in the research process. Part III, Making Sense, explores the issues and processes of interpretation and the ways researchers communicate their results. Retrospective as well as prospective in its approach, this is geography's first peer to peer engagement with qualitative research, detailing how to conceive, carry out and communicate qualitative research in the twenty-first century. Suitable for postgraduate students, academics and practitioners alike, this is the methods resource for researchers in human geography.

[Secrecy and Silence in the Research Process](#) Roisin Ryan-Flood, Rosalind Gill, 2013-05-13 Feminist research is informed by a history of breaking silences of demanding that women's voices be heard, recorded and included in wider intellectual genealogies and histories. This has led to an emphasis on voice and speaking out in the research endeavour. Moments of secrecy and silence are less often addressed. This gives rise to a number of questions: What are the silences, secrets, omissions and political consequences of such moments? What particular dilemmas and constraints do they represent or entail? What are their implications for research praxis? Are such moments always indicative of voicelessness or powerlessness? Or may they also constitute a productive moment in the research encounter? Contributors to this volume were invited to reflect on these questions. The resulting chapters are a fascinating collection of insights into the research process, making an important contribution to theoretical and empirical debates about epistemology, subjectivity and identity in research. Researchers often face difficult dilemmas about who to represent and how, what to omit and what to include. This book explores such questions in an important and timely collection of essays from international scholars.
