## **Whos Afraid Of The Multiverse:**

Who's Afraid of the Multiverse? Jeffrey A. Zeerink, 2008      **The Multiverse and Participatory Metaphysics** Jamie Boulding, 2021-09-30 This book offers a new theological approach to the multiverse hypothesis. With a distinctive methodology it shows that participatory metaphysics from ancient and medieval sources represents a fertile theological ground on which to grapple with contemporary ideas of the multiverse. There are three key thinkers and themes discussed in the book: Plato and cosmic multiplicity, Aquinas and cosmic diversity, and Nicholas of Cusa and cosmic infinity. Their insights are brought into interaction with a diverse range of contemporary theological, philosophical, and scientific figures to demonstrate that a participatory account of the relationship between God and creation leads to a greater continuity between theology and the multiverse proposal in modern cosmology. This is in contrast to existing work on the subject which often assumes that the two are in conflict. By offering a fresh way to engage theologically with multiverse theory, this book will be a unique resource for any scholar of Religion and Science, Theology, Metaphysics, and Cosmology.

Mary Jane Rubenstein, 2014-01-28 A religion professor elucidates the theory of the multiverse, its history and its reception in science, philosophy, religion, and literature. Multiverse cosmologies imagine our universe as just one of a vast number of others. Beginning with ancient Atomist and Stoic philosophies, Mary Jane Rubenstein links contemporary models of the multiverse to their forerunners and explores the reasons for their recent appearance. One concern is the so-called fine tuning of the universe: nature's constants are so delicately calibrated that it seems they have been set just right to allow life to emerge. For some thinkers, these fine tunings are evidence of the existence of God; for others, however, and for most physicists, God is an insufficient scientific explanation. Hence the multiverse's allure: if all possible worlds exist somewhere, then like monkeys hammering out Shakespeare, one universe is bound to be suitable for life. Of course, this hypothesis replaces God with an equally baffling article of faith: the existence of universes beyond before or after our own eternally.

generated yet forever inaccessible to observation or experiment In their very efforts to sidestep metaphysics theoretical physicists propose multiverse scenarios that collide with it and even produce counter theological narratives Far from invalidating multiverse hypotheses Rubenstein argues this interdisciplinary collision actually secures their scientific viability We may therefore be witnessing a radical reconfiguration of physics philosophy and religion in the modern turn to the multiverse Rubenstein's witty thought provoking history of philosophy and physics leaves one in awe of just how close Thomas Aquinas and American physicist Steven Weinberg are in spirit as they seek ultimate answers Publishers Weekly A fun mind stretching read clear and enlightening San Francisco Book Review **The One Who Is** Dr. Kenny Rhodes, 2015-02-27

This book is a comprehensive and concise treatment of the philosophical theological and biblical issues related to the doctrine of God Within its pages the nature existence and tri unity of God are presented in an understandable and clear manner The authors objective was to hold in highest regard the text of Holy Scripture while reflecting the biblical position of the historic orthodox faith The books tone is polemic and passionate sincere and scholarly with a commitment to communicate the truth of Gods Word with simplicity and profundity Also between its covers you will find a wealth of information with numerous references and explanatory notes for clarification and further personal study The book is arranged around the concept of the term logos which suffices many other words and turns them into fields of study as in the phrase theology Theos logos The term Logos refers to the concepts of epistemology ontology and hermeneutics Applied to the doctrine of God its organization deals with Knowing God the Being of God and Communicating God This corresponds to Thomas Aquinass approach to understanding God in the questions what is God we define God by negation what He is not how do we know God we know him by His effects how do you communicate or explain God God is communicated to us by His names that is His attributes The book furthermore presents a classic and newly reworked argument for the existence of God called the Existential Argument which is based on the notion of being God's Providence and Randomness in Nature

Robert John Russell, Joshua M. Moritz, 2019-02-11 In October 2014 a group of mathematicians physicists ecologists philosophers and theologians gathered at a special conference in Berkeley California to present the results of a two year research program dubbed Project SATURN This program explored many rich avenues of thought at the intersection of modern science and Christian theology Chief among them is the possibility that specific processes might be so complex that they do not have sufficient physical causes Known as ontological indeterminism this idea has profound implications for theology Specifically it allows God to be thought of as acting providentially within nature without violating the laws and processes of nature Such a momentous insight could influence how we understand free will natural evil suffering in nature and the relation between divine providence and human evolution The essays collected here discussed these topics and were initially presented at the 2014 conference Part I establishes the scientific basis for conceptualizing specific processes in the universe as inherently random and possibly indeterministic Part II discusses the philosophical and theological issues that

spring from this understanding Together they represent the cutting edge of thought in the increasingly productive dialogue between science and theology Short for the Scientific and Theological Understandings of Randomness in Nature Project SATURN was created by the Center for Theology and the Natural Sciences a Program of the Graduate Theological Union Berkeley It was funded with a grant administered by Calvin College and provided by the John Templeton Foundation *The Universe Next Door* James W.
