*Does State Spying Make Us Safer?* Michael Hayden, Alan Dershowitz, Glenn Greenwald, Alexis Ohanian, 2014-11-21 Does government surveillance make us safer The thirteenth Munk Debate held in Toronto on Friday May 2 2014 pitted Michael Hayden and Alan Dershowitz against Glenn Greenwald and Alexis Ohanian to debate whether state surveillance is a legitimate defence of our freedom the democratic issue of the moment In a risk filled world democracies are increasingly turning to large scale state surveillance at home and abroad to fight complex and unconventional threats but is it justified For some the threats more than justify the current surveillance system and the laws and institutions of democracies are more than capable of balancing the needs of individual privacy with collective security But for others we are in peril of sacrificing to a vast and unaccountable state surveillance apparatus the civil liberties that guarantee citizens basic freedoms and our democratic way of life In this edition of the Munk Debates former head of the CIA and NSA Michael Hayden and civil liberties lawyer Alan Dershowitz square off against journalist Glenn Greenwald and reddit co founder Alexis Ohanian to debate the legitimacy of state surveillance With issues of Internet privacy increasingly gaining prominence the Munk Debate on the Surveillance State asks Should government be able to monitor our activities in order to keep us safe

Meganets David B. Auerbach, 2023-03-14 How the autonomous digital forces jolting our lives as uncontrollable as the weather and plate tectonics are transforming life society culture and politics David Auerbach's exploration of the phenomenon he has identified as the meganet begins with a simple startling revelation There is no hand on

the tiller of some of the largest global digital forces that influence our daily lives from corporate sites such as Facebook Amazon Google YouTube Instagram and Reddit to the burgeoning metaverse encompassing cryptocurrencies and online gaming to government systems such as China's Social Credit System and India's Aadhaar As we increasingly integrate our society culture and politics within a hyper networked fabric Auerbach explains how the interactions of billions of people with unfathomably large online networks have produced a new sort of beast ever changing systems that operate beyond the control of the individuals companies and governments that created them Meganets Auerbach explains have a life of their own actively resisting attempts to control them as they accumulate data and produce spontaneous unexpected social groups and uprisings that could not have even existed twenty years ago And they constantly modify themselves in response to user behavior resulting in collectively authored algorithms none of us intend or control These enormous invisible organisms exerting great force on our lives are the new minds of the world increasingly commandeering our daily lives and inner realities Auerbach's analysis of these gargantuan opaque digital forces yield important insights such as The conventional wisdom that the Googles and Facebook of this world are tightly run algorithmic entities is a myth No one is really in control The efforts at reform to get lies and misinformation off meganets run into a brick wall because the companies and executives who run them are trapped by the persistent evolving and opaque systems they have created Bitcoin and other cryptocurrencies are uncontrollable and their embrace by elite financial institutions threatens the entire economy We are asking the wrong questions in assuming that if only the Facebooks of this world could be better regulated or broken up that they would be better more ethical citizens Why questions such as making algorithms fair and bias free and whether AI can be a tool for good or evil are wrong and misinformed Auerbach then comes full circle showing that while we cannot ultimately control meganets we can tame them through the counterintuitive measures he describes in detail
