**in Readers' Advisory** Cynthia Orr, 2014-12-05 One of the key services librarians provide is helping readers find books they'll enjoy. This crash course will furnish you with the basic practical information you need to excel at readers advisory RA for adults and teens. The question can you recommend a good book can be one of the most daunting you face notwithstanding the fact that recommender tools are ubiquitous. Often uncertainty arises because although librarians are called on to perform such services daily, readers advisory is a skill set in which most have no formal training. This guide will remedy that. It is built around understanding books, reading and readers and will quickly show you how to identify reading preferences and advise patrons effectively. You'll learn about multiple RA approaches such as genre appeal, features and reading interests and about essential tools that can help with RA. Plus you'll discover tips to help you keep up with this ever-changing field. There is no other professional book that covers the full spectrum of skills needed to perform the RA service that is in such great demand in libraries of all kinds. Helping readers find what they want is a sure way to serve patrons and build your library's brand. You will come away from this easy-to-understand crash course with the solid background you need to do both. *Libraries in the Information Age* Denise K. Fourie, Nancy E. Loe, 2016-05-23 The book *Library Media Connection* cited as something all librarians need to have on their shelves is now thoroughly revised for today's 21st-century library environment. Covering both technology and library practices, the title has been a go-to text for librarians and library school students since 2002. Since the second edition of this must-have book was published in late 2009, libraries have undergone profound changes primarily linked to advances in technology. We've seen the debut of RDA, the release of new Pew Research library and Internet use data and the establishment of digital repositories, community MakerSpaces and community reads programs. Of course, libraries have also been affected by the expanding use of social media. This thoroughly updated title addresses all these changes and more, bringing you up to date on the monumental shifts impacting librarianship. The book is designed to introduce LIS students to the profession, preparing them to enter an exciting and evolving world. It clarifies the changing roles and responsibilities of library professionals, new paradigms for evaluating information and characteristics and functions of today's library personnel. Among other subjects, chapters cover preparing materials for use, circulation, reference services, ethics in the information age, Internet trends and job search basics. References, websites and publications at the end of every chapter point to further resources and appendices supply information such as policies, the library bill of rights and the Freedom to Read statement.

**Literature and Social Media** Bronwen Thomas, 2020-01-31 From Instapoetry to BookTube, contemporary literary cultures and practices are increasingly intertwined with social media. In this lively and wide-ranging study, Bronwen Thomas explores how social media provides new ways of connecting with and rediscovering established literary works and authors while also facilitating the emergence of unique and distinctive forms of creative expression. The book takes a 360-degree approach to the subject, combining analysis of current forms and practices with an examination of how social media fosters ongoing collaborative discourse amongst both informal and formal literary networks and demonstrating how the participatory

practices of social media have the potential to radically transform how literature is produced shared and circulated The first study of its kind to focus specifically on social media Literature and Social Media provides a timely and engaging account of the state of the art while interrogating the rhetoric that so often accompanies discussion of the new in this context
