## **Critically Assessing the Reputation of Waldorf Education in Academia and the Public: Early Endeavours of Expansion, 1919-1955**

Ann-Kathrin Hoffmann, Marc Fabian Buck, 2024-04-01 The first of two volumes dedicated to this little explored topic this volume gathers international perspectives to critically assess how Waldorf education has been perceived and discussed in both public and academic arenas. The book thereby challenges the historical concept of Waldorf education as an international movement championing progressive education. Spanning the period 1919-1955 this first volume looks at countries with a longstanding tradition of Waldorf schools Germany, The Netherlands, Norway, Switzerland, Austria and Finland. The second volume which covers the period 1987-2004 focuses on more recent developments in Japan, Israel, Spain, Poland, Kenya, France, Slovenia and China. Throughout both books over 25 leading scholars present 16 case studies spanning 14 countries to discuss the history and perception of Waldorf education in the context of respective school systems and societies. By exploring the ramifications of these case studies against the background of existing research the books offer cutting edge perspectives and prompts for scholarly debates for this as yet under researched field. This book will be of interest to researchers, scholars and postgraduate students in international and comparative education, the theory of education and the philosophy of education. Policy makers interested in the history of education as well as practicing teachers and school staff at Waldorf education institutions may also benefit from the volume.

**Transformation of conventional Banking. Opportunities and risks of Fintech companies in Asset Management** Gleb Romanchuk, 2019-05-03 Master's Thesis from the year 2019 in the subject Business economics Banking Stock Exchanges Insurance Accounting grade 1 3 Berlin School of Economics and Law language English abstract The purpose of this work was to find out whether Fintechs are able to compete with Banks in the field of Asset Management Companies providing Robo Advisory services are considered to be the banks of the future Several interviews with companies working in this field have been conducted to investigate if the algorithms are prepared for the

next financial crash. This work contains 7 chapters starting with the motivation and research question. Secondly the general situation on the market will be described including the changes of customer behavior. This serves the purpose to give an understanding about the current market conditions. Thirdly the banking sector will be described considering definitions and regulations. In this work the focus will be on the German market therefore consumer behavior and details about the German retail banking industry are relevant. Subsequently chapter 4 deals with asset management and the new trends in the industry. Chapter 5 describes the development of the fintech industry. Definitions and regulations of the fintech companies are part of this chapter. In chapter 6 the scientific investigation will be conducted and presented. The results will show how stable the new technologies are in order to give an outlook for the future in the next chapter. Prospects for the future of retail banking and especially asset management will be mentioned in chapter 7. General current trends and forecasts are also part of this chapter. Since only limited literature is available about the fintech industry and especially robo advisory the investigation part includes a qualitative approach with interviews that have been conducted with qualified specialists that work or research in the robo advisory industry. The question of whether and how the robo advisors will survive the next financial crisis is topic of the interviews. There has been no financial crisis that might have caused unforeseen problems for the systems ever since the creation of robo advisory. Thus it is unknown how those technologies will react to chaotic market situations. The idea was to ask companies to what extent they are prepared for a financial crisis. The findings of this investigation will deal with the possible future outline of those fintechs providing algorithm based asset management. The question about the security framework has been answered with a view to examining the future development of the robo advisory industry.
