Popular Music in a Digital Music Economy Tim J. Anderson, 2013-12-17 In the late 1990s the MP3 became the de facto standard for digital audio files and the networked computer began to claim a significant place in the lives of more and more listeners. The dovetailing of these two circumstances is the basis of a new mode of musical production and distribution where new practices emerge. This book is not a definitive statement about what the new music industry is. Rather it is devoted to what this new industry is becoming by examining these practices as experiments dedicated to negotiating what is replacing an object based industry oriented around the production and exchange of physical recordings. In this new economy constant attention is paid to the production and licensing of intellectual property and the rise of the social musician who has been encouraged to become more entrepreneurial. Finally every element of the industry now must consider a new type of audience the end user and their productive and distributive capacities around which services and musicians must orient their practices and investments.

Digital Disruption Bharat Vagadia, 2020-09-25 This book goes beyond the hype delving into real world technologies and applications that are driving our future and examines the possible impact these changes will have on industries, economies and society at large. It details the actions governments and regulators must take in order to ensure these changes bring about positive benefits to the public without stifling innovation that may well be the future source of value creation. It examines how organisations in a world of digital ecosystems where industry boundaries are blurring must undertake radical digital transformation to survive and thrive in this new digital world. The reader is taken through a framework that critically examines i Digital Connectivity including 5G and IoT ii Data Capture and Distribution which includes smart connected verticals iii Data Integrity Control and Tokenisation that includes cyber security, digital signatures, blockchain, smart contracts, digital assets and cryptocurrencies iv Data Processing and Artificial Intelligence and v Disruptive Applications which include platforms, virtual and augmented reality, drones, autonomous vehicles, digital twins and digital assistants.

The Rise of the Curator Class Steffon Davis, 2019-03-14 Pairing big ideas in marketing with the popular activity of content curation. The Rise of the Curator Class positions curation as a humanization movement that is restructuring the internet. Curation is set to overturn the 2.2 trillion global creative industry revolutionizing how we create, market and discover content. In the era of content overload and fake news in which everything to buy, listen to, read or watch is available online, there is one group of people who have learned to thrive in this climate of superabundance: the curator class, whose influence and power grows as more people look to them as guides. This new curator class is rewriting traditional curation, tackling the overload and making sense of it for others. In the past, curation was available to an elite few. Now internet platforms such as Pinterest, Spotify and Twitter empower hundreds of millions of people to curate their ideas for anyone who may be interested, revolutionizing how content is marketed and sold. The Rise of the Curator Class explains how curation is disrupting internet commerce as consumer trust moves farther away from traditional brands and closer to the curators who

lead tastes and it equips readers to think critically about how curation can work for them Let's Agree to Disagree Nolan Higdon, Mickey Huff, 2022-02-22 In an age defined by divisive discourse and disinformation democracy hangs in the balance Let's Agree to Disagree seeks to reverse these trends by fostering constructive dialogue through critical thinking and critical media literacy This transformative text introduces readers to useful theories powerful case studies and easily adoptable strategies for becoming sharper critical thinkers more effective communicators and critically media literate citizens

Amerikaner Tayo Singleton, 2018-03-07 Studienarbeit aus dem Jahr 2017 im Fachbereich Geschichte Europas Europa Nachkriegszeit Note 2,0 Sprache Deutsch Abstract Spotify Netflix Facebook Google Apple und Co sind weltweit bekannte amerikanische Unternehmen. Die Produkte dieser Firmen sind mittlerweile tief im deutschen Alltag verankert und für viele junge Menschen im täglichen Umgang nicht mehr wegzudenken. So besitzt jeder vierte deutsche Jugendliche ein Smartphone der amerikanischen Firma Apple. 1. rund 44% der deutschen Jugendlichen hören amerikanische Musik über Streaming-Dienste wie z.B. Spotify.² Zu den von den Jugendlichen am meisten genutzten Medien zählen die angebotenen Dienste YouTube und WhatsApp der amerikanischen Internet-Giganten Google und Facebook. So deklarierten im Jahre 2016 ca. 65% der jungen Deutschen das Internetportal YouTube als die am liebsten genutzte Website.³ Dieses breit gefächerte Angebot an Internetdiensten schafft die Möglichkeit, die deutschen Jugendlichen auf verschiedenste Weise zu beeinflussen, sei es durch aktuelle Internet-Trends von Prominenten oder auch durch gezielte Nutzung der persönlichen Daten um mit bewusst geschalteter Werbung das Kaufverhalten der Jugendlichen zu manipulieren.⁴ Die verschiedenen Einflussfaktoren amerikanischer Unternehmen über das Internet und deren Auswirkungen auf die deutschen Jugendlichen im 21. Jahrhundert, die sogenannte Generation Z, lassen sich noch erheblich ausführlicher darstellen. Diese kurze Erläuterung reicht allerdings aus, um einen Vergleich zu dem Einfluss der Amerikaner auf die Jugend nach dem 2. Weltkrieg zum Thema dieser Arbeit ziehen zu können. Neben der Schilderung der allgemeinen Situation in den amerikanischen Besatzungszonen nach Ende des 2. Weltkrieges wird im weiteren Verlauf der amerikanische Einfluss auf die jungen Deutschen anhand konkreter Erlebnisse von Jugendlichen in der Stadt Kaufbeuren im Allgäu veranschaulicht.
