## **The Microsoft Case Antitrust High Technology And Consumer Welfare:**

*The Microsoft Case* William H. Page, John E. Lopatka, 2009-10-15 In 1998 the United States Department of Justice and state antitrust agencies charged that Microsoft was monopolizing the market for personal computer operating systems. More than ten years later the case is still the defining antitrust litigation of our era. William H. Page and John E. Lopatka's *The Microsoft Case* contributes to the debate over the future of antitrust policy by examining the implications of the litigation from the perspective of consumer welfare. The authors trace the development of the case from its conceptual origins through the trial and the key decisions on both liability and remedies. They argue that at critical points the legal system failed consumers by overrating government's ability to influence outcomes in a dynamic market. This ambitious book is essential reading for business law and economics scholars as well as anyone else interested in the ways that technology, economics and antitrust law have interacted in the digital age. This book will become the gold standard for analysis of the monopolization cases against Microsoft. No serious student of law or economic policy should go without reading it.

Thomas C. Arthur Emory University    **The Internationalisation of Competition Rules** Brendan J. Sweeney, 2009-09-10 The widespread move towards more market driven models of political economy combined with the expanding internationalisation of business and commerce has led to a series of proposals for global competition rules. To date these proposals have been hotly contested. The purpose of this book is to investigate in some depth whether there is a rational foundation for pursuing international competition rules and what form these laws should take. The book takes examples from existing competition laws around the world in particular the US and the EU both of which have a long history of enforcing established competition rules.

**Protecting EU Consumers in Internet of Things Ecosystems** Christof Koolen, 2025-10-21 The number of devices being connected to the internet is growing rapidly. This trend, referred to as the Internet of Things (IoT), reflects the gradual transformation of everyday objects into smart devices. These smart devices are capable of collecting data from their surroundings and sharing that data over the internet. As a result, the development of the IoT raises extensive legal questions from a consumer protection perspective. First, the functionality of smart devices challenges consumer autonomy and the average consumer's ability to make well informed transactional decisions. Second, concerns remain about consumer choice as consumers can't easily switch due to interoperability limitations. Third, consumer privacy is threatened by the data driven nature of the IoT. *Protecting EU Consumers in Internet of Things Ecosystems* explores solutions to these challenges by critically analyzing the interplay between EU consumer law, EU competition law, and EU data privacy law, aiming to balance innovation and consumer protection in IoT ecosystems. At a time when society must question how the benefits of IoT can be harnessed for the greater good rather than posing a threat to consumers, businesses, and governments, this volume offers valuable insights for academics, policymakers, businesses, and anyone interested in understanding the impact of technology on our daily lives.

**American Business Since 1920** Thomas K. McCraw, William R. Childs, 2017-11-30 Tells the story of how

America's biggest companies began operated and prospered post World War I This book takes the vantage point of people working within companies as they responded to constant change created by consumers and technology It focuses on the entrepreneur the firm and the industry by showing from the inside how businesses operated after 1920 while offering a good deal of Modern American social and cultural history The case studies and contextual chapters provide an in depth understanding of the evolution of American management over nearly 100 years American Business Since 1920 How It Worked presents historical struggles with decision making and the trend towards relative decentralization through stories of extraordinarily capable entrepreneurs and the organizations they led It covers Henry Ford and his competitor Alfred Sloan at General Motors during the 1920s Neil McElroy at Procter Ferdinand Eberstadt at the government's Controlled Materials Plan during World War II David Sarnoff at RCA in the 1950s and 1960s and Ray Kroc and his McDonald's franchises in the late twentieth century and early twenty first and more It also delves into such modern success stories as Amazon com eBay and Google Provides deep analysis of some of the most successful companies of the 20th century Contains topical chapters covering titans of the 2000s Part of Wiley Blackwell's highly praised American History Series American Business Since 1920 How It Worked is designed for use in both basic and advanced courses in American history at the undergraduate and graduate levels

[Creation without Restraint](#) Christina Bohannan,Herbert Hovenkamp,2012-01-13 Creation without Restraint Promoting Liberty and Rivalry in Innovation analyzes the current state of competition antitrust and intellectual property laws and proposes realistic reforms that will encourage innovation As with antitrust and a reform process that aligned injury requirements in lawsuits with the incentive to compete this book proposes similar reforms for patent and copyright law and considers both the uses and limitations of antitrust as a vehicle for intellectual property law reform

*Misuse of Market Power* Katharine Kemp,2018-06-28 Laws prohibiting unilateral anticompetitive conduct have been the subject of vigorous international debate for decades as policymakers antitrust scholars and agencies continue to disagree over how best to regulate the market conduct of a single firm with substantial market power Katharine Kemp describes the controversy over Australia's misuse of market power laws in recent years which mirrored the international debate in this sphere and culminated in the fundamental reform of the misuse of market power prohibition under the Competition and Consumer Act 2010 Cth in 2017 Misuse of Market Power Rationale and Reform explains Australia's new misuse of market power law which adopts an effects based test for unilateral conduct and makes a comparative analysis between Australian tests for unilateral anticompetitive conduct and tests from the US and the EU This text also illuminates the frequently mentioned but little understood concept of purpose and its role in framing unilateral conduct standards

Liebowitz, Stephen E. Margolis,1999 Have the antitrust actions by the Department of Justice against Microsoft and other firms really intended to protect consumers or are they politically motivated attempts to help competitors achieve what they could not achieve in the marketplace Can dominant companies in a market such as Microsoft lock in inferior technologies and thereby stifle innovation and would be competitors Do network effects the fact that some products such as telephones and fax machines increase in value as more people use them result in monopolies even if dominant companies do not seek to create monopolies Do the current antitrust laws discourage entrepreneurship and innovation Will the robust high tech competition and tremendous technological advances of recent years continue if government steps up its antitrust actions [Winners Losers Microsoft](#) addresses such questions and sheds light on the real workings of the high tech markets Through extensive research and insightful analysis Professors Liebowitz and Margolis shatter many long held beliefs about competition in the high technology industries Among their surprising findings Software prices fall dramatically in markets where Microsoft is a major player but prices show no strong tendency to fall over time if Microsoft is not a factor in a given market Claims that dominant but inferior technologies can lock out better competitive products are not supported by the data This not only applies to software but also to other technology markets i e VHS vs Beta video recorder battles Superior products tend to dominate in high technology even if inferior products are backed by lots of money For example Intuit s Quicken has dominated Microsoft Money for several years despite intensive efforts by Microsoft to promote Money And AOL has significantly increased its market share in recent years even through Microsoft incorporated software for the Microsoft Network into its Windows operating system Liebowitz and Margolis demonstrate how a high tech company can go from a dominant market leader as Lotus once was in spreadsheets to an also ran with astonishing speed They show that free markets in high technology do a remarkable job of continually delivering better products at lower prices to consumers [Winners Losers Microsoft](#) makes a compelling case that the real danger to American high technology leadership is a too powerful too intrusive government which believes it knows consumer preferences and needs better than they do This book is a cogent tightly argued rebuttal to frequent calls for greater government intervention in the high technology markets
