of sterile examples It is the third volume in a trilogy by Avinash C Kak following Programming with Objects Wiley 2003 and Scripting with Objects Wiley 2008 Designing with Objects confronts how difficult it is for students to learn complex patterns based on conventional scenarios that they may not be able to relate to In contrast it shows that stories from the fictional world of Harry Potter provide highly relatable and engaging models After explaining core notions in a pattern and its typical use in real world applications each chapter shows how a pattern can be mapped to a Harry Potter story The next step is an explanation of the pattern through its Java implementation The following patterns appear in three sections Abstract Factory Builder Factory Method Prototype and Singleton Adapter Bridge Composite Decorator Facade Flyweight and Proxy and the Chain of Responsibility Command Interpreter Iterator Mediator Memento Observer State Strategy Template Method and Visitor For readers use Java code for each pattern is included in the book s companion website All code examples in the book are available for download on a companion website with resources for readers and instructors A refreshing alternative to the abstract and dry explanations of the object oriented design patterns in much of the existing literature on the subject In 24 chapters Designing with Objects explains well known design patterns by relating them to stories from the fictional Harry Potter series
