with Paraview on a Cray XT4 ,2010 Scientific data sets produced by modern supercomputers like ORNL s Cray XT 4 Jaguar

can be extremely large making visualization and analysis more difficult as moving large resultant data to dedicated analysis systems can be prohibitively expensive We share our continuing work of integrating a parallel visualization system ParaView

on ORNL s Jaguar system and our efforts to enable extreme scale interactive data visualization and analysis We will discuss

porting challenges and present performance numbers Jaguar is a Cray XT4 with 7 832 compute nodes each with 4 cores and

8GB of memory located in Oak Ridge Tennessee Jaguar is currently ranked No 8 in the Top 500 Jaguar and other machines

like it enable increasingly larger data sets Whether scientists are producing extremely massive data or small data they still

have a requirement for analysis Analysis is often difficult for larger data and it is further complicated when the user is distant to the data Data sets that are too large to ship and or analyze on a single desktop require a parallel analysis tool and a high

performance computer to run on Running ParaView interactively on Jaguar is a positive improvement for both local and

remote users We have shown that it is feasible for our user at LANL to visualize his simulation data created on jaguar Local

users may face fewer obstacles and get improved performance due to their higher bandwidth to Jaguar For future work we

would like to see higher priority queues that enable interactive visualization A more interactive user friendly qsub that

estimates time to allocation would be very useful Hopefully our work will lead to more users attempting interactive visualization on Jaguar resulting in quicker turnaround times for visualization and analysis As users migrate to using supercomputing platforms for visualization we expect future research possibilities in this area Strategies for Efficient Parallel Visualization Steffen Frey,2014 PVGS , Parallel Visualization and Compute Environments for Graphics Clusters Magnus Strengert,2010 **An Extensible Parallel Visualization Tool for the Observation of Distributed Arrays** Zia Ansari,1996 VIPAR: an Environment for the Development of Parallel Visualization Modules Steven Larkin,University of Manchester.
