c't Working with AI c't-Redaktion, 2024-01-24 The special issue of c't KI Praxis provides tests and practical instructions for working with chatbots. It explains why language models make mistakes and how they can be minimised. This not only helps when you send questions and orders to one of the chatbots offered online. If you do not want to or are not allowed to use the cloud services for data protection reasons for example you can also set up your own voice AI. The c't editorial team explains where to find a suitable voice model, how to host it locally and which service providers can host it. The fact that generative AI is becoming increasingly productive harbours both opportunities and risks. Suitable rules for the use of AI in schools, training and at work help to exploit opportunities and minimise risks.

Artificial Historians

Marnie Hughes-Warrington, Anne Martin, Lewis Yarlupurka O'Brien, 2025-08-08 This book offers readers an introduction to the world of artificial histories and historians. It looks behind the interfaces of AI and explores everyday platforms and prize winning history books to identify how people and algorithms make histories and how they might make histories in the future. Every moment around the globe histories are made about ordinary people who use digital devices. These histories are not made by professional historians or even by humans but by artificial intelligence that scours our digital footprints for patterns. AI histories not only shape recommendations about what we might buy or stream but also our access to education, healthcare and justice. The outcomes of recommendation systems are not just a technology problem or an ethics problem. This book argues that this is also a history problem and it needs to be understood as one if we are to make fairer or more just systems. It shows us that the deep history of history making including Australian Aboriginal and First Nations histories can help us to navigate the future of history in AI. Presenting readers with a range of familiar and accessible examples, Artificial Historians is a valuable resource for students, scholars and all those interested in global historiography, technology and artificial intelligence.

AI Aesthetics Jan-Noël Thon, Lukas R.A. Wilde, 2025-09-09 This volume investigates the intersection of generative AI and media aesthetics from an interdisciplinary perspective. Combining in-depth theoretical reflection with a diverse selection of case studies, its authors explore the aesthetic forms of AI generated medial objects as well as the cultural imaginaries that the latter draw upon. Bringing together a group of scholars from various geographic and disciplinary backgrounds, the chapters move within and across different conceptualizations of AI aesthetics that can be located in between an aesthetics as artistics that is primarily concerned with aesthetic judgments related to skill and connoisseurship and an aesthetics as aisthetics that identifies all kinds of embodied perception as its object. The book thus reflects on both the theoretical and the methodological implications of AI aesthetics while also demonstrating that this is still very much an emerging research field and that no dominant conceptualization of AI aesthetics has yet emerged. Considering its decidedly international and interdisciplinary scope, AI Aesthetics: AI Generated Images between Artistics and Aisthetics will appeal to scholars and students within media studies, cultural studies, literary studies, philosophy, art history, visual culture studies.
