new Principles of Accounting text that better reflects a more conceptual and decision making approach to the material. The authors have taken a new macro to micro approach to the Principles of Accounting course by starting with a discussion of real financial statements first rather than starting with the Accounting Cycle although the Accounting Cycle is thoroughly covered in Chapters 3 and 4. The objective is to establish how a financial statement communicates the financing, investing and operating activities of a business to users of accounting information. They motivate students by grounding the discussion in the real world showing them the relevance of the topics covered to their future career. Business Mathematics William Dillon, 1989.
