Universe is still expanding and
cooling from this explosion

**Big Bang
Theory**

The universe began when an
extremely dense concentration of
matter (one single atom) that
exploded

Evidence

Red shift - when we look at distant galaxies
we see that their spectrum is shifting to the
longer wave red color. This means they are
moving away from us.

Cosmic Background Radiation - the light
remains from the Big Bang have now become so
stretched out from expansion that they
are microwaves.

Doppler Effect - waves that are moving away from
us are longer because they are being stretched.
When waves are moving towards us, they are
shorter because they are being compressed.

Blue shift - moving
