## **Teaching About The Future:**

Teaching about the Future P. Bishop, A. Hines, 2012-06-26 The faculty at the University of Houston's program in Futures Studies share their comprehensive integrated approach to preparing foresight professionals and assisting others doing foresight projects Provides an essential guide to developing classes on the future or even establishing whole degree programs **Teaching about the Future** Barbara Miller, John D. Haas, Leslie Hendrikson, 1987 A study of the future for children youth and adults The topic is multidisciplinary in nature and congenial to many subjects in the curriculum

**Teaching about the Future**, 1992 Attempts to establish a framework to pool regional expertise facilitate communication and create a firm programme for further development in the teaching of futures in higher education Summarizes discussions by academics active in this field from 8 Pacific Basin countries Begins with an overview of the knowledge base in future studies as reviewed in papers and discussions on the first day of the seminar Continues with an overview of teaching approaches from the second day's papers and discussions Includes some of the papers presented on each day Appendix comprises seminar program Makes recommendations including the formation of an interuniversity network for future oriented education and training TEACHING AND LEARNING WITH EMERGING TECHNOLOGY: A Future Perspective Dr. P. Muthukumar, Dr. A.R.S. Kannan, Dr. K. Malini, This edited book focuses on the possible education responses that can be implemented in future education times The impact of technology on learning and teaching is often at the forefront of demands particularly from those who dictate the funding available to pay for technology within education systems This is not an unreasonable request and there is merit in impact evaluations of educational technologies including emerging technologies Besides it also shows how emerging technologies including Artificial Intelligence Blockchain Educational Games and Virtual Reality Augmented Reality will reshape the future of education to provide efficient learning teaching experiences and assessments Furthermore the book discusses innovative teaching and learning approaches e.g. the use of open educational practices and peer to peer learning that can be applied in this rapidly moving technological era to maintain education including in unconditional times Particularly new instructional methods such as game based learning should be designed based on integrated technologies to provide an effective learning experience resulting in better learning outcomes Future education should not solely focus on technology and psychology but also on the applied instructional methods as well as the human touch to maintain authentic and effective learning experiences The book also discusses how teaching and learning can be designed to meet the growing tendency of Open and Distance Education where thousands of learners can be taken the same course from different cultures backgrounds and learning needs This book aims to establish itself through the published books textbooks and research as a medium to provide guidelines and recommendations for different stakeholders including policymakers educational designers teachers and students on how to enhance both learning and teaching experiences in the future for better learning outcomes as well as how to maintain education in emergency times

It also provides one step ahead towards future education to prepare different stakeholders for the rapid evolution of education even in times of emergency and difficult situations

**Lessons for the Future** David Hicks, 2015-05-29 Drawing on the latest research in futures studies this book provides new insights into ways of helping both students and teachers think more critically and creatively about their own future and that of wider society It acknowledges the crucial role of education in helping young people understand the nature of local and global change and the social and environmental impacts such change will have on their future Setting out a clear educational rationale for promoting global and futures perspective in education it provides helpful and stimulating examples of futures orientated classroom activities It also includes fascinating research into children s views of the future

Learning for Tomorrow Alvin Toffler, 1974 Analyzes the way the future is dealt with in college and high school classrooms and calls for drastic changes in the way educators prepare individuals for life in the future

**The Future of the Post-Massified University at the Crossroads** Jung Cheol Shin, Ulrich Teichler, 2013-11-22 The modern university started as an innovative model a research driven teaching and service model in the 19th century but the contemporary university is in a crisis of identity The major challenge is how to harmonize different missions e g teaching research and service The triple function has become questionable and research now dominates the other two functions in contemporary higher education This book takes a step towards further academic and policy discussions on the restructuring the triple functions of university and designing the future of the post massified university
