Understanding Language Classroom Contexts Martin Wedell,Angi Malderez,2013-04-11 Arguably the whole point of education is to effect change in what people know and are able to do Globalization has contributed to a common perception worldwide of the need to introduce changes to the teaching and learning of languages The success of many attempts to do so has been limited by insufficient consideration of implementation contexts *Understanding Language Classroom Contexts* explores and illustrates how what happens in any language classroom is influenced by and can be an influence on the contexts in which it is situated A clear understanding of these influences is thus the starting point for planning effective change The book considers many visible and invisible features of the multiple layers of any context and provides a framework for understanding the types of factors that may influence whether changes planned by a teacher or externally initiated are likely to be successful The book will help teachers and educational managers or change planners outside the classroom to understand why their classrooms are as they are and so to make informed decisions about what can or cannot or not easily be changed and suggests how any changes might be appropriately managed

Candlin,2014-06-06 **Process and Experience in the Language Classroom** argues the case for communicative language teaching as an experiential and task driven learning process The authors raise important questions regarding the theoretical discussion of communicative competence and current classroom practice They propose ways in which Communicative Language Teaching should develop within an educational model of theory and practice incorporating traditions of experimental and practical learning and illustrated from a wide range of international sources Building on a critical review of recent language teaching principles and practice they provide selection criteria for classroom activities based on a typology of communicative tasks drawn from classroom experience The authors also discuss practical attempts to utilise project tasks both as a means of realising task based language learning and of redefining the roles of teacher and learner within a jointly constructed curriculum

Bridging Teaching, Learning and Assessment in the English Language Classroom Tijen Akşit,Hande İşil Mengü,Robin Turner,2018-11-12 Learning English as a foreign language in any formal education context requires opportunities for learners and teachers to give and receive feedback on the teaching learning

process as it is happening These opportunities could be created via various in class activities specifically designed for this purpose Teachers who create and use these diagnostic opportunities effectively detect what learners need in a timely fashion and provide remedial teaching in the right time and mode so that chances can be created for learners to improve their learning There is no one universally accepted way of how to do this however with various approaches for collecting analyzing and reviewing data for this purpose This book encapsulates the unbreakable relationship between teaching learning and assessment through a range of articles which scrutinize assessment from a wide spectrum ranging from the role of assessment in language learning to ELT teacher assessment literacy from the use of technology in classroom based assessment to practicing teachers reflections on their teacher classroom action research and from the role of the Common European Framework of Reference for Languages CEFR to empirical data analysis

A Systems Approach to Language Pedagogy Akira Tajino,2019-04-05 This volume represents the first attempt in the field of language pedagogy to apply a systems approach to issues in English language education In the literature of language education or more specifically second or foreign language learning and teaching each topic or issue has often been dealt with independently and been treated as an isolated item Taking grammar instruction as an example grammatical items are often taught in a sequential step by step manner there has been no road map in which the interrelations between the various items are demonstrated This may be one factor that makes it more difficult for students to learn the language organically The topics covered in this volume including language acquisition pedagogical grammar and teacher collaboration are viewed from a holistic perspective In other words language pedagogy is approached as a dynamic system of interrelations In this way emergent properties are expected to manifest This book is recommended for anyone involved in language pedagogy including researchers teachers and teacher trainers as well as learners

Teaching-and-learning Language-and-culture Michael Byram,Carol Morgan,1994 Increasingly cultural learning is seen as an integral part of foreign language learning This book offers a practical introduction to the issues by providing

descriptions of classroom practice of curriculum innovation and of experimental courses *Project-Based Learning Applied to the Language Classroom* Juliana Franco Tavares/ Louise Emma Potter, 2018-03-05 In Project Based Learning Applied to the Language Classroom the authors propose a way to develop PBL in the language classrooms taking into account all of the obstacles and specifics involved in teaching a foreign language It is about teaching English as a second or foreign language using Project Based Learning PBL We approach this combination because many people seem to think about implementing PBL in their language classes and ask questions about how to do it but feel that there aren't enough materials based on this methodology In fact most researchers and writers we have come across discuss the applications of PBL in the students mother tongue to subjects such as Math History Literature Social Studies and Science However there are few published works about the specifics of PBL in foreign language classes Besides it seems obvious to us that the main difficulty in developing projects in a second or foreign language lies exactly on the fact that communication may be hindered when students do not have enough knowledge in the target language
