Humanizing LIS Education and Practice Keren Dali, Nadia Caidi, 2020-10-29

Humanizing LIS Education and Practice: Diversity by Design demonstrates that diversity concerns are relevant to all and need to be approached in a systematic way. Developing the Diversity by Design concept articulated by Dali and Caidi in 2017, the book promotes the notion of the diversity mindset. Grouped into three parts, the chapters within this volume have been written by an international team of seasoned academics and practitioners who make diversity integral to their professional and scholarly activities. Building on the Diversity by Design approach, the book presents case studies with practice models for two primary audiences: LIS educators and LIS practitioners. Chapters cover a range of issues including, but not limited to, academic promotion and tenure, the decolonization of LIS education, engaging Indigenous and multicultural communities, librarians, professional development in diversity and social justice, and the decolonization of library access practices and policies. As a collection, the book illustrates a systems thinking approach to fostering diversity and inclusion in LIS, integrating it by design into the LIS curriculum and professional practice. Calling on individuals, organizations, policymakers and LIS educators to make diversity integral to their daily activities and curriculum, Humanizing LIS Education and Practice: Diversity by Design will be of interest to anyone engaged in research and professional practice in Library and Information Science.

2. Construct PBL cases and facilitator guides aligned with educational goals and learning outcomes.
3. Transform and develop teachers from being instructors to becoming facilitators.
- 4.

Advise students through PBL to overcome challenges and avoid pitfalls 5 Facilitate a PBL session to promote active learning 6 Create and manage PBL examinations 7 Generate meaningful feedback for both PBL facilitators and learners for continuous improvement 8 Migrate PBL from traditional physical classrooms to online environments 9 Adopt AI in the practice of PBL 10 Overcome challenges and avoid pitfalls in PBL implementation

OUTCOME-BASED CURRICULUM IN ENGINEERING EDUCATION EARNEST, JOSHUA, GUPTA, SHASHI KANT, 2021-11-02 Engineering Education has emerged as a fast developing discipline in itself with universities across the world opening up exclusive Departments of Engineering Education which is also impacting the socio economic system in India. Most of the engineering institutions in India are part of the hub and spoke university education system unique to India. Scientifically developing the Outcome based Curriculum OBC uniformly across India has been a daunting task due to the dearth of an authentic book on OBC addressing the need of the Indian Engineering Education System. This being the first book of its kind in India and with OBC serving as the Constitution of Outcome based Education OBE it will go a long way to address this need. The unique feature of this book is that it is replete with examples to explain the various concepts of planning, designing and implementing the OBC in engineering institutions. Different aspects of Outcome based Teaching Learning (OBL) and Outcome based Assessment (OBA) are also discussed vividly. Apart from the examples weaved into the lucidly written seven chapters additional examples and important formats are provided in the Annexures. Another unique feature of this book is that every engineering UG PG or Diploma teacher would be happy to possess a personal copy of this book for 24x7 access which will help to clear their doubts as it arises then and there.

TARGET AUDIENCE Technical Instruction, Technical Teacher Trainers, Curriculum Specialists, Instructional Designers, Education Policy Makers.

What the reviewers say

The technical education has to adopt Outcome Based Curriculum and there was a dire need of authentic literature which would serve as a base document for scientifically developing OBC. The book reflects the expertise of both the authors who have more than 30 years of experience in industry and academics in designing and implementing different variants of OBC for various technical education programmes. Such a book will serve as a reference for future generations to avoid re-inventing the wheel again and again.

Dr M P Poonia, Vice Chairman, AICTE National Institute of Technical Teacher Training and Research (NITTTR) Bhopal has been spearheading different forms of OBC for the last five decades in which the authors have contributed substantially. Care has been taken such that this book will not only benefit the Indian engineering education system but also the engineering teaching fraternity at the international context.
