The Black Death, 2nd Edition Diane Zahler, 2013-01-01 Could a few fleas really change the world? In the early 1300s, the world was on the brink of change. New trade routes in Europe and Asia brought people in contact with different cultures and ideas, while war and rebellions threatened to disrupt the lives of millions. Most people lived in crowded cities or as serfs tied to the lands of their overlords. Conditions were filthy as most people drank water from the same sources they used for washing and for human waste. In the cramped and rat infested streets of medieval cities and villages, all it took were the bites of a few plague infected fleas to start a pandemic that killed roughly half the population of Europe and Asia. The bubonic plague wiped out families, villages, even entire regions. Once the swollen black buboes appeared on victims' bodies, there was no way to save them. People died within days. In the wake of such devastation, survivors had to reevaluate their social, scientific, and religious beliefs, laying the groundwork for our modern world. The Black Death outbreak is one of world history's pivotal moments.

Than Shwe's Burma, 2nd Edition Diane Zahler, 2012-08-01 Than Shwe was part of a military coup that took over Burma in the 1960s. The British had granted Burma independence in 1948, but the country, with its many ethnic groups, had trouble building a democratic government. Than Shwe rose through the military ranks, and after the army stepped in to quell demonstrations and riots that began on August 8, 1988, he emerged as head of the military council. He became one of the most secretive and repressive leaders in the world. Than Shwe uses Burma's resources to finance a strong military. To suppress dissent, his soldiers destroy the countryside, sending people into hiding, refugee camps, or slavery. His control has isolated the country.

from international observers In 2007 Internet images of monks being beaten during a protest rally reached the rest of the world This was followed by reports in 2008 of a devastating cyclone when Than Shwe banned outside aid for weeks Both events helped to raise global awareness about the human rights abuses suffered by the Burmese people In Than Shwe's Burma learn more about this dictatorship and about Burma's long struggle to become a free nation

Sandra Stotsky,2015-02-19 Teachers cannot teach what they do not know This country has tolerated a weak licensing system for prospective teachers for decades This weak system has been accompanied by an increasingly emptier curriculum for most students depriving them of the knowledge and skills needed for self government An Empty Curriculum How Teacher Licensure Tests Lead to Empty Student Minds makes the case that the complete revision of the licensing system for prospective and veteran teachers in Massachusetts in 2000 and the construction of new or more demanding teacher licensing tests contributed significantly to the Massachusetts education miracle That miracle consisted of enduring gains in achievement for students in all demographic groups and in all regional vocational technical high schools since 2005 gains confirmed by tests independent of Massachusetts policy makers The immediate purpose of this book is to explain what Massachusetts did in 2000 to strengthen its teacher licensing and re licensing system to ensure that all teachers could teach to relatively strong K 12 standards Its larger purpose is to suggest that development of strong academic standards in all major subjects should be followed by complete revision of a state's teacher licensing system not as has been the case for several decades the development of K 12 student tests if this country wants to strengthen public education
