The Vj Inspirations And Practical Advice For Live Visuals Performance:

The VJ Book Paul Spinrad, 2005 VJing is a type of performance that combines the visual possibilities of filmmaking with the improvisational ability of jazz. The Joy of VJ written by a former editor at Wired Magazine is the first ever introduction to this popular but largely uncharted field combining straight how to information with cultural context and history. Spinrad provides technical advice both for beginners and experienced VJs. Includes DVD of software and performances **VJing**

, 2010 **Software Takes Command** Lev Manovich, 2013-07-04 Offers the first look at the aesthetics of contemporary design from the theoretical perspectives of media theory and software studies **Vom Sound zum bewegten Visual** Julian Hartmuth, 2015-02 Licht ist für den Menschen lebensnotwendig. Es ist die wichtigste Grundlage unserer Wahrnehmung. Über 80 Prozent aller Informationen nimmt der Mensch über die Augen auf. Damit sind sie des Menschen wichtigstes Sinnesorgan. Ohne Licht wäre dies nicht möglich, da es die visuelle Wahrnehmung überhaupt erst möglich macht. Wer genauer hinschaut, entdeckt vor allem in Großstädten heutzutage an unterschiedlichen Orten eine neue Kunstform, die erst durch Licht möglich wurde. Bei den sogenannten Visuals versucht der Künstler Musik auch Sound genannt visuell umzusetzen. Kaum eine moderne öffentliche Veranstaltung kommt ohne diese visuelle Kunstform aus. Trotz der allgegenwärtigen Existenz wissen die wenigsten Menschen genauer, über diese relativ neue Kunstform. Obwohl Visuals unberührbar sind, ist das Interesse an der Kunstform sehr gering. Da man in der Öffentlichkeit wenig über Visuals lesen kann, wird in diesem Buch versucht, die gelaufigen Begriffe, die Geschichte, die Hintergründe, die theoretische und praktische Umsetzung sowie die Szene genauer zu beleuchten. **Process Cinema** Scott MacKenzie, Janine Marchessault, 2019-07-11 Handmade films stretch back to cinema's beginnings, yet until now, their rich history has been neglected. Process Cinema is the first book to trace the development of handmade and hand-processed film in its historical and contemporary contexts and from a global perspective. Mapping the genealogy of handmade film and uncovering confluences, influences and interstices between various international movements, sites and practices, Process Cinema positions the resurgence of handmade and process cinema as a counter practice to the rise of digital filmmaking. This volume brings together a range of renowned academics and artists to examine contemporary artisanal films, DIY labs and filmmakers typically left out of the avant garde canon, addressing the convergence between the analog and the digital in contemporary process cinema. Contributors investigate the history of process cinema, unscripted improvisatory manipulation of the physicality of film with chapters on pioneering filmmakers such as Len Lye and Marie Menken, while others discuss an international array of collectives devoted to processing films in artist run labs from South Korea to Finland, Australia to Austria and Greenland to Morocco, along with historical and contemporary practices in Canada and the United States. Addressing the turn to a new sustainable creative ecology that is central to handmade films in the twenty-first century and that defines today's reinvigorated film cultures, Process Cinema features some of the most beautiful handcrafted films and the most forward thinking filmmakers within a global context. **Animated Painting** Suzanne

Practices of Projection Gabriel Menotti,Virginia Crisp,2020-02-05 To many the technological aspects of projection often go unnoticed only brought to attention during moments of crisis or malfunction For example when a movie theater projector falters the audience suddenly looks toward the back of the theater to see a sign of mechanical failure The history of cinema similarly shows that the attention to projection has been most focused when the whole medium is hanging in suspension During Hollywood s economic consolidation in the 30s projection defined the ways that sync sound technologies could be deployed within the medium Most recently the digitization of cinema repeated this process as technology was reworked to facilitate mobility These examples show how projection continually speaks to the rearrangement of media technology Projection therefore needs to be examined as a pivotal element in the future of visual media s technological transition In Practices of Projection Histories and Technologies volume editors Gabriel Menotti and Virginia Crisp address the cultural and technological significance of projection Throughout the volume chapters reiterate that projection cannot and must not be reduced to its cinematic functions alone Borrowing media theorist Siegfried Zielinski s definition Menotti and Crisp refer to projection as the heterogeneous array of artefacts technical systems and particularly visual praxes of experimentation and of culture From this readers can understand the performative character of the moving image and the labor of the different actors involved in the utterance of the film text Projection is not the same everywhere nor equal all the time Its systems are in permanent interaction with environmental circumstances neighboring structures local cultures and social economies Thus the idea of projection as a universal fully autonomous operation cannot hold Each occurrence of projection adds nuance to a wider understanding of film screening technologies
