

Math: Quarter 2

Common Core	Notes
OA 1. Interpret products of whole numbers, e.g., interpret 5×7 as the total number of objects in 5 groups of 7 objects each. For example, describe a context in which a total number of objects can be expressed as 5×7 .	
OA 2. Use multiplication and division within 100 to solve word problems in situations involving equal groups, arrays, and measurement quantities, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem: $\square \times 3 = 15$ (unknown end)	
OA 3. Determine the unknown whole number in a multiplication or division equation relating three whole numbers. For example, determine the unknown number that makes the equation true in each of the equations $6 \times \square = 48$, $5 = \square \div 3$, $6 = 54 \div \square$ (Multiplication Only)	
OA 4. Apply properties of operations as strategies to multiply and divide. Examples: If $8 \times 4 = 32$ is known, then $4 \times 8 = 32$ is also known. (Commutative property of multiplication.) $3 \times 5 = 2$ can be found by $2 \times 5 = 10$, then $15 \div 2 = 30$, or by $5 \times 2 = 10$, then $3 \times 10 = 30$. (Associative property of multiplication.) Knowing that $8 \times 5 = 40$ and $5 \times 2 = 10$, one can find 8×7 as $8 \times (5 + 2)$ or $(8 \times 5) + (8 \times 2) = 40 + 16 = 56$. (Distributive property.) Students need not use formal terms for these strategies.	
NF 1. Understand a fraction as a number on the number line; represent fractions on a number line diagram. a. Represent a fraction $\frac{1}{b}$ on a number line diagram by defining the interval from 0 to 1 as the whole and partitioning it

Curriculum with the Common Core State Standards: a Teacher's Plan for Implementation Brooke L.N..

Webster,California State University, Sacramento,2013 The last implementation of state standards was in 1997 when
California and the rest of the country were in an economic climate that supported growth in so many aspects including
education In 2010 the state of California adopted new State Standards set forth by the federal and state governments
California teachers are tasked with implementing these standards however many teachers are not being provided with the
necessary tools to support their teaching With larger class sizes and little to no money teachers are being asked to change in
an environment that offers them little to no support Common Core Standards are of the educational future in California Due
to the lack of financial support in buying new curriculum that aligns to these standards teachers will have rely on their own
professional practices to help them implement to these new standards For the teachers in many districts this means
developing support lessons and materials that align with these new standards while using their old non aligned curriculum as
the base This master s project will help teachers to bridge the curricular gap in the fractions unit of the third grade math
curriculum Macmillan McGraw Hill 2008 The project s supplemental lessons will coincide with the textbook lessons while at
the same time aligning with the CCSS This project includes written lesson plans that can be easily implemented by third
grade teachers in my district and will assist them to be teaching based upon the new CCSS Using the current third grade
curriculum alongside the Common Core State Standards National Governor s Association Center for Best Practices and
Council of Chief State School Officers NGA CCSSO 2010 as well as other fractions resources I developed supplemental
fractions lessons that any teacher could use In addition to the detailed lessons themselves the project contains all
instructional materials including student in class worksheets and suggested assessments *Connecting with the Past*
