**Reading and Writing** Judith A. Langer,1986 This volume presents the results of a two year research project which  
examined the development and use of reading and writing by school aged children The studies examined the relationships  
between children s reading and writing by looking at the social contexts that surrounded their understandings and uses of  
reading and writing the cognitive processes that the readers and writers invoked in completing different kinds of tasks and  
the products that were produced including the ideas that were developed in reading and writing and the ways in which these  
ideas were structured in presentation or recall The results point to new understandings about children s context for literacy  
and ways in which children at distinctly different phases of their schooling experiences approach reading and writing The  
author contrasts ways in which children at each of the differing ages approach their reading and writing tasks illuminating  
the knowledge they already have and what they have yet to learn      Writing Prompts and Story Starters Rhino Beetle
