Make / Believe John Hartley, 2025-01-23 This book illustrates that

mediated popular culture and science based knowledge systems entangled and compromised as both have become are still a robust crucible for system change for the future when they combine forces Planetary crises require responses from everyone This means that collective action is not simply a scientific or political problem It is a problem of culture and media But modern politics journalism and science were not designed for global climate action They've divided humans into competitive and often hostile we and they groups Identity news and knowledge are all weaponized Culture makes groups groups make knowledge and knowledge makes enemies What can be done to prevent global conflict and the drift to war Make Believe turns to popular culture and social media to argue for an alternative storyline While the Great Powers are making new enemies emergent classes led by children are using planetary connectivity to make new worlds A digital planet generates new kinds of strategic stories for pan human action based on difference intersectionality and cooperation for a sustainable Earth system Make Believe shows how alternatives to the Great Game of global contestation are gathering strength in unlikely places among women children lifestyle and pop culture Popular digital media literacy is now a prerequisite for the remediation of the planet

Transanal Minimally Invasive Surgery (TAMIS) and Transanal Total Mesorectal Excision (taTME)

Sam Atallah, 2019-04-23. This book captures cornerstone developments in a new body of knowledge and provides an expert resource on a hot topic in rectal surgery. Transanal minimally invasive surgery (TAMIS) was designed for local excision of select rectal neoplasms; however, soon it became realized that the TAMIS technique could be used for applications beyond local excision, most notably for transanal total mesorectal excision (taTME). This new operative technique has revolutionized our approach to the distal rectum by allowing for improved access, especially in obese male patients with an android pelvis, and by minimizing abdominal wall access trauma. The endpoints of improved oncologic resection as defined by mesorectal envelope completeness, negative circumferential resection margins, and negative distal margin are assessed. This book details controversies, pitfalls, and future directions of taTME and TAMIS. Chapters are authored by those on the forefront of innovation with TAMIS and taTME, and each is considered an authority on the topic.

Transanal Minimally Invasive Surgery (TAMIS) and Transanal Total Mesorectal Excision (taTME) is a must have reference for surgeons who are performing this operation and fellows in training who want to completely understand the various nuances of TAMIS and taTME

Supernova Era

Cixin Liu,2019-10-22 From science fiction legend Cixin Liu the New York Times bestselling and award winning author of The Three Body Problem comes a vision of the future that reads like Ursula K Le Guin rewriting The Lord of the Flies for the quantum age NPR In those days Earth was a planet in space In those days Beijing was a city on Earth On this night history as known to humanity came to an end Eight light years away a star has died creating a supernova event that showers Earth in deadly levels of radiation Within a year everyone over the age of thirteen will die And so the countdown begins Parents apprentice their children and try to pass on the knowledge needed to keep the world running But when the world is theirs the last generation may not want to continue the legacy left to them And in shaping the future however they want will the children usher in an era of bright beginnings or final mistakes This audacious and ultimately optimistic early work will give Liu s English reading fans a glimpse at his evolution as a writer and give any speculative fiction reader food for deep thought Shelf Awareness At the Publisher s request this title is being sold without Digital Rights Management Software DRM applied
