Adsensory Financialisation Pamela Odih, 2016-09-23 Adsensory technology presupposes a neoliberal entrepreneurial self as an integral feature of its biopolitical financialisation of healthcare regimes According to Michel Foucault neoliberalism is indebted to the endeavour of its self disciplined subjects investing human capital in a self regulated entrepreneurial pursuit of responsible healthcare and well being Primarily informed by social network analytics and virtual ethnographic observations this book identifies the biopolitical basis of adsensory technologies It argues that a paradoxical feature of adsensory technologies dissimulating that there is nothing Jean Baudrillard is the proliferation of risk This is because the dissimulation of nothing opens up the possibility that everything can be a risk in so far as the type of event it falls under can be treated according to the principles of insurance technology Francois Ewald Adsensory wearable technologies are called upon as a strategy of deterrence Jean Baudrillard to indemnify capitalism s production of signs which dissimulate their simulation In a context in which much that was certain now feigns its own existence the insurance professed by adsensory technologies provides for an unrealisable guarantee against indefinable unknowable risks Based also on case studies of European Court of Justice personal finance insurance rulings this book engages critically with the neoliberal construct of the entrepreneurial lifestyle insurance subject Social network analytics are utilised here to map bio technology onto neoliberal regimes of financialised well being and healthcare provision In so doing the book situates adsensory technologies within the marketising healthcare management programmes that are currently aligning the neoliberal reengineering of health and well being citizenship with the biopolitical healthcare financialisation of populations

Paradoxically in their endeavour to actor network virtual well being health communities adsensory technologies proliferate the individuating marketised conditions of neoliberal self regulating entrepreneurialism This gives rise to aleatory materialist dialectics of financialised surveillance far exceeding the regulatory time and space modalities of Foucauldian panoptics and Mathiesen synoptics Adsensory technologies are integral to a seismic transformation in the cultural economies of time presently eliding digital advertising and insurantial technologies Axiomatic with the synchronic times of the adsensory technologies valorised by lifestyle insurance much riskier asynchronous embodied times transgressively dissimilating the limits of financialisation are beginning to emerge **Game Design Secrets** Wagner James Au,2012-09-19 Design great Facebook iOS and Web games and learn from the experts what makes a game a hit This invaluable resource shows how to put into action the proven design and marketing techniques from the industry s best game designers who all started on a small scale The book walks novice and experienced game designers through the step by step process of conceptualizing designing launching and managing a winning game on platforms including Facebook iOS and the Web The book is filled with examples that highlight key design features explain how to market your game and illustrate how to turn your design into a money making venture Provides an overview of the most popular game platforms and shows how to design games for each Contains the basic principles of game design that will help promote growth and potential to generate revenue Includes interviews with top independent game developers who reveal their success secrets Offers an analysis of future trends that can open or close opportunities for game designers Game Design Secrets provides aspiring game designers a process for planning designing marketing and ultimately making money from new games **Mobile and Social Media Journalism** Anthony

Adornato,2021-07-29 Now in its second edition Mobile and Social Media Journalism continues to be an essential resource for learning how journalists and news organizations use mobile and social media to gather news distribute content and engage with audiences Merging theory and practice the book includes checklists and practical activities in every chapter enabling readers to immediately build the mobile and social media skills that today s journalists need and which news organizations expect The second edition retains a focus on journalism s core values such as authentication verification and credibility while guiding readers on how to apply them to digital media activities The book also offers an in depth discussion of the audience s active role in producing content how mobile devices and social media have changed the way the audience consumes news and what these changes mean for journalists Updated to address the latest trends in multimedia journalism the second edition includes two new chapters Writing mobile friendly web stories and The spread of fake news This is a valuable resource for journalism students as well as media professionals seeking to update their skills The book also features a companion website at www.mobileandsocialmediajournalism.com providing online resources for students and lecturers including video tutorials industry news and sample assignments The book s Twitter account MobileJourn and Facebook page fb.com/mobileandsocialmediajournalism share the latest industry trends and offer tips for teaching the topic **Beginning**

Visual C# 2012 Programming Karli Watson, Jacob Vibe Hammer, Jon D. Reid, Morgan Skinner, Daniel Kemper, Christian Nagel, 2012-12-17 Step by step beginner's guide to Visual C# 2012 Written for novice programmers who want to learn programming with C# and the .NET framework this book offers programming basics such as variables, flow control and object-oriented programming. Explains the debugging process and error handling as well as object-oriented programming and much more. Beginning Microsoft Visual C# 2012 Programming offers beginners a guide to writing effective programming code following simple step by step methods each followed by the opportunity to try out newly acquired skills.

Facebook for Seniors: Beginner's Guide Matthew Hollinder, 2015-04-10 Facebook is the most popular online social network. Originally developed to connect college students, Facebook is used by different people from around the world amounting to its 1.39 billion users. The website gained popularity by providing an easy means of communication between people. Instead of having to send several messages to different people about how you are doing, you can post one update on Facebook to alert everyone. It also allows you to share pictures and other media with multiple people simultaneously, creating simpler and faster communication. More and more people join the network daily and the fastest growing demographic of users are in the age group of 55 and over, proving that Facebook is no longer a network limited to teenagers and young adults. People of all age groups and backgrounds recognize the value in the services it provides, which is why Facebook has become a social buzzword because of its prominence in modern culture and interaction.

Successful College Writing with 2021 MLA Update Kathleen T. McWhorter, 2021-10-01 This ebook has been updated to provide you with the latest guidance on documenting sources in MLA style and follows the guidelines set forth in the MLA Handbook 9th edition April 2021. Using graphic organizers, revision flowcharts and annotated readings, Successful College Writing shows you clearly how writing works. Hands-on writing activities and step-by-step drafting and revising guidance combine to help you succeed at the college level.
