**Essential Topics Study Guide 2013** ExamREVIEW,2012-09-23 In the practical real world a CPP may be a security manager an external consultant or a law enforcement agent For purpose of the exam however you want to position yourself as a hired consultant one who acts as an advisor to the company management The company is your client and you are helping it out You advise you guide and you recommend You need to understand your client If your client is absolutely new to security full scale interviews and statistical analysis on crimes may be necessary However if your client has a working security mechanism in place then you should conduct assessment basing primarily on inputs from management In other words management determines the depth and scope of the security project Management makes the decisions You suggest ways to improve then carry out the decisions made by management You don t normally make decisions for your client It is safe to say that you assume the role of project manager for your client s security project The security project would start by discussing the scope of work with your client The most important meeting between you and the client would be the initial goal setting and policy

review meeting Senior management is going to get involved and you are going to act as the facilitator From this meeting you become aware of the level of risk your client is willing to assume and accept Your work would then start from there When working on a project it is important to understand the background and operation of the client You also want to know what you are up against Protection against vandalism is totally different from protection against terrorist attack A CPP is more on the planning and management side of security A security guard professional on the other hand is to provide client with professional protective services It is believed that the CPP certification is more general in nature while the PSP certification is way more specific and in depth in physical security To summarize the major knowledge areas include Security Principles and Theories Business Principles Personnel Security Physical Security Information Security Crisis Management Investigations Legal Matters We give you knowledge information relevant to the exam specification To be able to succeed in the real exam you ll need to apply your earned knowledge to the question scenarios Many of the exam questions are written to be less straight forward They tend to be framed within the context of short scenarios An advice Do NOT rely on a single source for exam preparation To secure exam success always use multiple sources and read as much as possible     Cpp Certified Payroll Professional Certification Exam Examfocus Study Notes & Review Questions 2014 Examreview,2013-10-20 The CPP designation is granted by the American Payroll Association APA to those who successfully complete the Certified Payroll Professional CPP examination for five full calendar years at which time recertification is required plus some other requirements The primary goal of the CPP certification program is to promote the standard for payroll professionals as accepted by the business community and the public at large The 4 hour CPP multiple choice exam covers Core Payroll concepts Compliance Principles of Paycheck Calculations Payroll Process and Systems Accounting Management and Administration This ExamFOCUS book focuses on the more difficult topics that will likely make a difference in exam results The book is NOT intended to guide you through every single official topic You should therefore use this book together with the official prep books for the best possible preparation outcome During the real exam you ll need to apply your earned knowledge to the question scenarios     **Certified Protection Professional Exam Review and Self Study Guide** ,1995
