Advanced Educational Technology: Research Issues and Future Potential Thomas T. Liao, 1996-03-18 Proceedings of the NATO Advanced Research Workshop on Advanced Educational Technology Research Issues and Future Potential held in Grenoble France September 25 28 1993

Interactive Learning Technology for the Deaf Ben A. G. Elsendoorn, Frans Coninx, Annelies Brekelmans, 1993 This book is the final result of the NATO Advanced Research Workshop Interactive Learning Technology for the Deaf which was held between June 4 7 1991 in Sint Michielsgestel the Netherlands The scientific organizing committee consisted of Frans Coninx director Ben Elsendoorn Richard Foulds and Christopher Jones The idea for this workshop originated from the observation that interactive learning technology seemed to be very promising in that it might help improve education of deaf children but also from the given fact that general achievements in helping deaf children to acquire language could still be improved Before this workshop results on research in the areas of sign language acquisition and education of deaf children improvement of speech production and listening skills as well as the use of interactive learning technology could be gathered in journals and at congresses However no meeting was ever organised where experts from these different fields were present at the same time The aim of the workshop was to bring together experts in the fields of deaf education as well as interactive learning technology to construct a multi disciplinary platform where ideas and research results could be discussed from various angles and which would serve as a jumping board for future collaboration We thought it essential that specialists from various directions in deaf education i.e. bilingual oral and Total Communication TC approaches were present to contribute to the multi disciplinary character of the workshop
