Language Change and Nineteenth-Century Science Catherine Watts, 2023-06-05 Have you ever looked at a word and thought I wonder where that came from You might well find the answer in this book which considers the origin and formation of some of the many thousands of new words that were coined in English during the nineteenth century in the broad field of science Changes in society are often accompanied by the need to find names for such changes which in turn has an impact on how the language develops as a result The British Industrial Revolution ushered in a new era of language change which led to many new coinages in the English language reflecting scientific knowledge as it developed Many of these neologisms belong to specialist vocabulary but others do not and it is these lay coinages which form the focus of this book and are

located within their social cultural and historical backgrounds Aimed at postgraduate students of the English language and all those interested in the history of the English language this work explores new worlds and offers an original and fascinating etymological journey through nineteenth century science in its broadest sense *Birkenhead Park* Robert Lee,2024-04-15 When it was officially opened on Easter Monday 5 April 1847 Birkenhead Park became the first municipally funded park in Britain It was a pioneer in the development of urban public parks designed for use by everyone irrespective of social class ethnicity or age In terms of town planning it demonstrated the importance of including green infrastructure in urban development as a vital contribution to public health and well being Paxton s design for the park was heralded as a masterpiece of human creative genius it served as a vehicle for the global transmission of the English landscape school and led to the creation of numerous public parks everywhere most famously Central Park New York incorporating many of Paxton s design features This book addresses a long standing gap in the Park s historiography Regarded as one of the greatest wonders of the age the Park is an important contribution to nineteenth century landscape history with a local focus but of international significance The book also seeks to interpret the Park s development until 1914 within a political and cultural context drawing on economic and social history as a means of explaining why it was not until the late nineteenth century that it finally became a focal point for recreation and public health *The Library World* ,1925 *Catalogue of Current Periodicals Received at the Public Library of Victoria* Public Library, Museums, and National Gallery (Vic.),1905 **Library World** ,1925 **The Garden of Ideas** Richard Aitken,2010 The Garden of Ideas tells an inspiring and engaging story of Australian garden design From the imaginings of emigrant garden makers of the late eighteenth century to the concerns of twenty first century gardeners this book charts its way across four centuries through a handsome and satisfying fusion of images and text The Garden of Ideas is embellished with an unparalleled array of images paintings drawings prints plans and photographs each richly evocative of their time and most never previously published Unearthed from around Australia and many from overseas these images carry the story of Australian garden style down the years in the process criss crossing social and cultural history across the wide extremes of our continent Richard Aitken whose book *Botanical Riches* was published in 2006 to popular and critical acclaim brings a lifetime of experience to *The Garden of Ideas* He achieves fresh insights and presents our passion for garden making with wit and flair *The Garden of Ideas* is a valuable source book for the sophisticated gardener and an indispensable companion for the garden lover *Glasshouses* Fiona Grant,2013-07-10 Since the early seventeenth century when the cultivation of exotic plants and fruit became fashionable in northern Europe glasshouses have offered an artificial climate in which they could flourish At first these structures were within reach only of the very richest and growing one s own oranges orchids pineapples or bananas was a sign of great wealth but by the mid nineteenth century manufacturers emerged to cater for a growing middle class market Glasshouses became increasingly sophisticated with different types tailored to house specific crops and manufacturers competing with one another by
