This book is not a historical or archaeological treatise but rather a study in which the author looks at the past not as a
historian but as a planner who has the ambition to unravel the early manifestations of his discipline a discipline which did not
exist as such in remote periods but the ingredients of which were nevertheless present The author has observed the past
equipped with knowledge and understanding of what regional planning was in the second half of the twentieth century and
still is He stands in the period of the first decades after the Second World War which were the formative years of regional
planning and looks back at bygone ages He discusses ideas and literature from the immediate post war period in order to
examine the ancestry of regional planning through their lens The book will attract a broad range of readers because of its
approach and its wide coverage of historical periods and world regions Although Europe is the main focus the book contains
material on all continents and all periods the ancient world the medieval age and the modern era The history of Urban
Planning is taught and researched widely but the history or pre history before the twentieth century of Regional Spatial
