The Will To Kill Making Sense Of Senseless Murder 4th Edition:

American Homicide Richard M. Hough, Kimberly D. McCorkle, 2019-08-26 American Homicide examines all types of homicide and gives additional attention to the more prevalent types of murder and suspicious deaths in the United States. Authors Richard M Hough and Kimberly D McCorkle employ more than 30 years of academic and practitioner experience to help explain why and how people kill and how society reacts. This brief yet comprehensive book takes a balanced approach combining scholarly research and theory with compelling details about recent cases and coverage of current trends.

Comparative coverage of homicide types and rates in countries around the world shows how American homicide statistics compare internationally. *Serial and Mass Murder* Elizabeth A. Gurian, 2021-09-30 This book reframes the study of multicide that is serial and mass murder to use objective measures and aims to expand our understanding of multicide offending through descriptive and inferential statistical analyses of different homicide patterns of the offenders. Criminal homicide and multiple murders are rare occurrences that typically account for a very small percentage of all violent crimes in most countries. Despite this low occurrence homicide continues to be an area of intense study with a focus on subjective measures and classifications. The research and analysis based on a database of over 1 300 cases contributes to the criminological study of violence and draws distinctions between the types of offenders partnered and solo serial and mass male and female etc from a range of different countries and across decades. Traditionally studies of homicide focus on male offenders and theories of offending are then applied to females and co offenders. The research presented in this book reveals that women and partnered offenders have very different homicide patterns from men. Looking at the history of multicide offending this book uses descriptive and inferential statistical analyses to directly compare differences in offending and outcome patterns across multicide offender types. This exploration of the multidimensionality of homicide at an international level is useful for scholars and students interested in criminal justice, criminology, psychology, sociology or law.

The SAGE Encyclopedia of Surveillance, Security, and Privacy Bruce A. Arrigo, 2016-06-15 In all levels of social structure from the personal to the political to the economic to the judicial The SAGE Encyclopedia of Surveillance Security and Privacy uncovers and explains how surveillance has come to be an integral part of how our contemporary society operates worldwide.

Handbook of Forensic Sociology and Psychology Stephen J. Morewitz, Mark L. Goldstein, 2013-08-20 The role of behavioral and social sciences in the courtroom setting has expanded exponentially in the past few decades. It is now widely recognized that scientists in these areas provide critical contextual information for legal decision making and that there is a reliable knowledge base for doing so. While there are many handbooks of forensic psychology this is the first such volume to incorporate sociological findings broadening the conceptual basis for examining cases in both the civil and criminal realms including immigration issues, personal injury, child custody and sexual harassment. This volume will examine the responsibilities of expert witnesses and consultants and how they may utilize principles, theories and methods from both

sociology and psychology It will show these disciplines together can improve the identification and apprehension of criminals as well as enhance the administration of justice by clarifying profiles of criminal behavior particularly in cases of serial killers death threat makers stalkers and kidnappers The volume is quite comprehensive covering a range of medical school environmental and business settings Throughout it links basic ideas to real applications and their impact on the justice system

Educational Psychology Steven R. Wininger, Antony D. Norman, Bruce W. Tuckman (deceased), 2024-12-18

Educational Psychology distills the latest research into actionable steps guiding students in building solid evidence based teaching plans as they prepare to enter the classroom Employing a meta cognitive approach it encourages them to think about their dual role as both teachers and learners understanding not just what to do in the classroom but the why behind it Motivation is a central theme with the authors providing a practical framework to help teachers enhance student motivation and connect it to key themes and concepts throughout the text Rather than taking an encyclopedic approach the authors group chapters by topic enabling readers to remember concepts and connect best practices to big ideas in educational psychology By blending scholarship with application through vignettes examples case studies and practical teaching strategies this text equips students to be both methodical and creative in their future classrooms
