National League of Teachers' Associations, 1927 **The Mathematics Teacher**, 1922 **STEM the Tide** David E. Drew, 2015-05 Proven strategies for reforming STEM education in America's schools, colleges, and universities. One study after another shows American students ranking behind their international counterparts in the STEM fields: science, technology, engineering, and math. Businesspeople and cultural critics such as Bill Gates warn that this alarming situation puts the United States at a serious disadvantage in the high tech global marketplace of the twenty-first century. President Obama places improvement in these areas at the center of his educational reform. What can be done to reverse this poor performance and to unleash America's wasted talent? David E. Drew has good news and the tools America needs to keep competitive. Drawing on both academic literature and his own rich experience, Drew identifies proven strategies for reforming America's schools, colleges, and universities, and his comprehensive review of STEM education in the United States offers a positive blueprint for

the future These research based strategies include creative and successful methods for building strong programs in science and mathematics education and show how the achievement gap between majority and minority students can be closed A crucial measure he argues is recruiting educating supporting and respecting America s teachers Accessible engaging and hard hitting STEM the Tide is a clarion call to policymakers administrators educators and everyone else concerned about students participation in the STEM fields and America s competitive global position Copy and Go Joan M.
