Written with the practitioner or student of neurology in mind, *Neurology Image-based Clinical Review* profiles each condition in an easy-to-read format alongside a wealth of images designed to help develop proficiency in recognizing and treating both common and rare neurologic conditions. This unique book is organized into fifteen chapters covering all major areas of neurology, including stroke, hemorrhage, neoplasms, epilepsy, trauma, neurodegenerative conditions, infectious diseases, pediatric syndromes, and much more. Each topic is introduced with a brief case scenario and image-based diagnosis, followed by bulleted introduction, clinical presentation, radiographic appearance, and diagnostic hallmarks, differential diagnosis, and treatment. Numerous examples throughout foster familiarity with key imaging findings and confidence interpreting MRI, CT, MRA, angiography, EEG, gross and microscopic neuropathology images. Selected references for further study follow each topic. *Neurology Image-Based Clinical Review* is an essential reference for medical students, practicing neurologists, residents, and anyone looking to hone their knowledge or anyone.
