Lean Project Management Claus Hüppelmann, 2023-10-31 Many organisations face the challenge of making their project management more agile. However the circumstances are often not suitable for this. The desired agility either does not fit the existing projects or there is a lack of sufficient systematics. Lean Project Management shows how the advantages of different Lean Project Management methods adaptive, targeted and flexible can be combined. In addition to the established methods of classic and agile project management proven methods and tools from Lean Management are used and further developed with a view to the requirements of project management such as Gemba, 5S and more. The book shows how an organisation can systematically professionalise its project management and make it more flexible in a targeted manner in order to achieve more value with less effort. Aimed at students on postgraduate courses in business and project management as well as professional project managers working in organisations both large and small. Lean Project Management is a clear and comprehensive guide to combining the best methods to achieve optimal results.

Urban Agriculture for Growing City Regions Undine Giseke, Maria Gerster-Bentaya, Frank Helten, Matthias Kraume, Dieter Scherer, Guido Spars, Fouad Amraoui, Abdelaziz Adidi, Said Berdouz, Mohamed Chlaida, Majid Mansour, Mohamed Mdafai, 2015-09-07 This book demonstrates how agriculture can play a determining role in integrated climate optimised urban development. Agriculture within urban growth centres today is more than an economic or social left over or a niche practice. It is instead a complex system that offers multiple potentials for interaction with the urban system. Urban open space and agriculture can be linked to a productive green infrastructure this forms new urban-rural linkages in the urbanizing region and helps shape the city. But in order to do this agriculture has to be

seen as an integral part of the urban fabric and it has to be put on the local agenda Urban Agriculture for Growing City Regions takes the example of Casablanca one of the fastest growing cities in North Africa to investigate this approach The creation of synergies between the urban and rural in an emerging megacity is demonstrated through pilot projects design solutions and multifunctional modules These synergies assure greater resource efficiency particularly regarding the use and reuse of water and they strengthen regional food security and the social integration of multiple spheres A transdisciplinary research approach brings together different scientific disciplines and local actors into a process of integrated knowledge production The book will have a long lasting legacy and is essential reading for researchers planners practitioners and policy makers who are working on urban development and urban agricultural strategies [Business Management](#) Harald
