## **The Glaucoma A Practical Evidence Based Approach To Patient Care:**

The Glaucoma Book Paul N. Schacknow, John R. Samples, 2010-06-10 Putting together a comprehensive multiauthored text is a daunting task. However, the benefits may justify the effort. Such is the case with regards to the present Glaucoma Book. It is not likely that many ophthalmologists or others will decide at the end of a busy day to pour themselves a cocktail and settle into a comfortable chair with this large tome in hand with the intent of reading it from start to finish. A pity it would make several enjoyable and profitable days of good reading. The text starts with comments by an individual who is strongly grounded in the fundamentals of being a good physician. Ivan Goldberg has used his brilliance, his wide international experiences and knowledge and his commitment to assuring that physicians know their craft to provide a penetrating perspective on ophthalmology today and tomorrow. The Glaucoma Book ends with commentaries by the editors John Samples, a true physician scientist and Paul Schacknow, an experienced community based clinician. Samples' essay 'What Really Causes Glaucoma' nicely describes the leading theories underlying the cell biology of glaucoma. In 'What Do We Know Now? What Do We Need to Know About Glaucoma?' Schacknow offers an essay on some of the controversial ideas raised within the book and speculates on future research.
