The Goal Audiobook:

Audiobooks for Youth Mary Burkey, 2013 Audiobooks are now a staple in most public and school libraries and with good reason since they have a clear role in the education of today's born digital generation. Burkey, who has been following their rise in popularity for years, combines a fascinating history of the medium and practical tips for using them in a readable guide applicable to school and public librarians as well as classroom teachers. Enriched with reflections and comments from authors, audiobook narrators, producers, reviewers, and librarians, this book shows how audiobooks not only benefit struggling readers and bring families together but also fit neatly within newly accepted standards for early literacy education. Demonstrates how to use audiobooks as classroom and library tools for learning. Identifies how to locate must have audiobooks and offers advice for maintaining a collection. Including an overview of the major audiobook awards and lists of additional resources, Burkey's guide will help librarians and educators unlock the educational potential of audiobooks for youth.

Audiobooks, Literature, and Sound Studies Matthew Rubery, 2011-05-09 This is the first scholarly work to examine the cultural significance of the talking book since the invention of the phonograph in 1877, the earliest machine to enable the reproduction of the human voice. Recent advances in sound technology make this an opportune moment to reflect on the evolution of our reading practices since this remarkable invention. Some questions addressed by the collection include: How does auditory literature adapt printed texts? What skills in close listening are necessary for its reception? What are the social consequences of new listening technologies? In sum, the essays gathered together by this collection explore the extent to which the audiobook enables us not just to hear literature but to hear it in new ways. Bringing together a set of reflections on the enrichments and impoverishments of the reading experience brought about by developments in sound technology, this collection spans the earliest adaptations of printed texts into sound by Charles Dickens, Thomas Hardy, and other novelists from the late nineteenth century to recordings by contemporary figures such as Toni Morrison and Barack Obama at the turn of the twenty-first century. As the voices gathered here suggest, it is time to give a hearing to one of the most talked about new media of the past century.
