*Value Investing in Swiss Real Estate Shares* Jakob Herzog, 2016. This thesis confronts the Modern Finance Theory with an alternative investment approach, the Value Investing Theory, in order to compare their performances. As studies comparing the performance of the two concepts regarding whole stock market indices and industrial companies are available and research regarding Swiss real estate investment companies is scarce, this thesis focuses on investing in Swiss real estate investment companies. Therefore, this thesis will analyze the companies of the SXI Real Estate Shares Index according to value investment criteria at the date of the launch of the index (01/12/2009) and then a value investing portfolio is created. The performance of this value investing portfolio is then compared with the SXI Real Estate Shares Index performance both from 01/12/2009 until the termination date of this master thesis (17/01/2016). At the end, this thesis can state which investment theory was more successful regarding investments in Swiss real estate investment companies and provides the base for further implications concerning the two investing theories.

50 Real Estate Investing Calculations Michael Lantrip, 2018-01-13. When Real Estate Investors say "I wish I'd known that this is what they are talking about," Real Estate Investing Calculations are the Rules of Real Estate Investing, and you must know the rules. Real Estate Investing offers you four huge benefits that other forms of investing do not: Cash Flow, Asset Appreciation, Financial Leverage, and Special Tax Treatment. But your success will depend on how well you estimate these items before you purchase a property and how well you manage them after you purchase. A basic rule of Business Management is: In order to manage, you must first measure. And that's the purpose of 50 Real Estate Investing Calculations. This book teaches you how to generate these numbers yourself and explains their meanings. These Calculations are the tools of your trade.
