Review of "On the Vatican Library of Sixtus IV" by J.W. Clark, Reprinted from the Cambridge Antiquarian Society's Proceedings and Communications for 6 March 1899 ,1800 "A" History of the Papacy During the Period of the Reformation Mandell Creighton,1887 Communicating Papal Authority in the Middle Ages Minoru Ozawa,Thomas W. Smith,Georg Strack,2023-02-17 This book bridges Japanese and European scholarly approaches to ecclesiastical history to provide new insights into how the papacy conceptualised its authority and attempted to realise and communicate that authority in ecclesiastical and secular spheres across Christendom Adopting a broad yet cohesive temporal and geographical approach that spans the Early to the Late Middle Ages from Europe to Asia the book focuses on the different media used to represent authority the structures through which authority was channelled and the restrictions that popes faced in so doing and the less certain expression of papal authority on the edges of Christendom Through twelve chapters that encompass key topics such as anti popes artistic representations preaching heresy the crusades and mission and the East this interdisciplinary volume brings new perspectives to bear on the medieval papacy The book demonstrates that the communication of papal authority was a two way process effected by the popes and their supporters but also by their enemies who helped to shape concepts of ecclesiastical power Communicating Papal Authority in the Middle Ages will appeal to researchers and students alike interested in the relationships between the papacy and medieval society and the ways in which the papacy negotiated and expressed its authority in Europe and beyond

Richardson,2007-01-01 Renaissance art history is

traditionally identified with Italian centers of production and Florence in particular. Instead, this book explores the dynamic interchange between European artistic centers and artists and the trade in works of art. It also considers the impact of differing locations on art and artists and some of the economic, political, and cultural factors crucial to the emergence of an artistic center. During c. 1420–1520, no city or court could succeed in isolation, and so artists operated within a network of interests and local and international identities. The case studies presented in this book portray the Renaissance as an exciting international phenomenon with cities and courts inextricably bound together in a web of economic and political interests.
